1. Air Tasking Order (ATO).
2. Computer-Assisted Force Management System (CAFMS).
3. Fragmentary Order.

20. ABSTRACT (Continue on reverse side if necessary and identify by block number)

Proposes a computer program functional description by which Air Tasking Orders (Fragmentary Orders) may be generated in a fraction of the currently required time. Includes computer generated products currently under development at the 314th Air Division, Osan, Korea. Proposes the method and organization by which this new capability would be best implemented by the Tactical Air Control Center to achieve maximum advantage in execution of the air battle and air campaign planning.

REPLY TO ATTN OF: DO

29 JUL 1981

SUBJECT: Computerization of the Air Tasking Order (ATO) Preparation System

TO: See Distribution

REFERENCE: The Computer Assisted Air Tasking Order Preparation System. A paper by Major Joseph P. Sowa, 603 TACCS, 314th Air Division, Combat Plans Division, Osan Air Base, Korea. Accomanying software development by Major Peter L. Crossman, same office.

1. Theater commanders worldwide have not been able to properly influence the air battle in a timely manner. The main problem has been the manual procedures used to translate commander's force apportionment and allocation decision into a usable frag order. The 30 hours currently required to manually perform this function adversely affects our commanders' ability to respond to the dynamic nature of any future air battle. Additionally, as a result of this manual effort, many of the normal operational tasks such as targeting and weaponeering have been taken over by other functional areas. We cannot and must not allow this situation to continue. A rapid, responsive and accurate system must be developed and implemented immediately if we are to succeed in the air war of the future.

2. To this end, two members of the 603 TACCS, 314th Air Division, Combat Plans, have developed a computer assisted Air Tasking Order (ATO) generation system including a computerized program which promises to make substantive savings in time, maintain, if not increase accuracy of the frag order, and most importantly, provide our commanders the responsiveness they need to successfully conduct an air campaign. It attacks the primary problem, i.e., the manual production of the ATO. By incorporating software programs in the preparation of the ATO we realize all the benefits that computerization can provide and actually revolutionize the commander's capability to manage his tactical forces in a timely manner. Shortening of the decision-to-action cycle presents the TACAIR commander with unprecedented opportunity to inject strategy, tactics and objectives into the frag order on short notice. This capability will become absolutely required as the new surveillance and target acquisition technology comes on board in the mid-80's. Without it, a further erosion of command will occur, with personnel other than those in operations and command functions making forces employment decisions.

3. The author proposes that this computerized system, already impressively demonstrated in 314AD Combat Plans Division operations, be further developed as an integrated part of the Computer Assisted Force Management System (CAFMS) and Constant Watch programs. I strongly recommend this action be considered.

After witnessing the initial work by Majors Sowa and Crossman, I am convinced that incorporation of this capability is an essential step to managing tactical air war fighting forces in the coming years.

BARRY J. HOWARD, Colonel, USAF
DCS, Operations

COMBAT PLANS DIVISION, USAF, KOREA

AN ENHANCEMENT TO THE COMPUTER ASSISTED FORCE MANAGEMENT SYSTEM (CAFMS) AND CONSTANT MATCH PROGRAM

29 JULY 1981

INDEX

EXECUTIVE SUMMARY

THEATER COMMANDERS WORLD WIDE HAVE NOT BEEN ABLE TO INFLUENCE THE AIR BATTLE IN A TIMELY MANNER. THE MAIN CULPRIT CAUSING THIS STATE OF AFFAIRS HAS BEEN THE MANUAL PROCEDURES USED TO TRANSLATE COMMANDERS FORCE APPORTIONMENT AND ALLOCATION DECISION INTO A USABLE FRAG ORDER. WE CANNOT AND MUST NOT ALLOW THIS SITUATION TO CONTINUE.

CURRENTLY, COMMANDERS MAKE FORCE APPORTIONMENT AND ALLOCATION DECISIONS MORE THAN 30 HOURS PRIOR TO THE TIME PERIOD THEY ARE EFFECTIVE. THIS IS NECESSARY DUE TO THE SLOWNESS OF THE PRESENT MANUAL ATO PREPARATION AND DISSEMINATION PROCESS. TWENTY HOURS ARE REQUIRED TO PREPARE THE MOST COMPLEX ATO. AN ADDITIONAL 10 HOURS IS REQUIRED FOR COMMUNICATIONS AND AIRCRAFT PREPARATION LEAD TIME. PRESENT PROGRAMS TO IMPROVE THIS SITUATION ADDRESS IMPROVEMENTS IN COMMUNICATIONS BUT DO NOT ATTACK THE PRIMARY PROBLEM: MANUAL PRODUCTION OF THE ATO.

THIS PAPER PROPOSES EXPANSION OF CURRENT PROGRAMS TO EXTEND COMPUTER ASSISTANCE BENEFITS TO PREPARATION OF ATO. THE CURRENT 20 HOUR ATO GENERATION TIME CAN BE REDUCED TO APPROXIMATELY 6 HOURS OR LESS. TWO BENEFITS ARE DERIVED:

1. SIGNIFICANT DECREASE IN THE COMMANDER'S DECISION LEAD TIME FOR APPORTIONMENT AND ALLOCATION.

2. OPPORTUNITY TO INJECT NEAR REAL TIME INTELLIGENCE AND FLEETING TARGET EXPLOITATION INTO AIR BATTLE STRATEGY AND OBJECTIVES AS EXPRESSED IN THE ATO.

THE COMPUTER ASSISTED ATO PREPARATION CAPABILITY DESCRIBED HEREIN NOT ONLY IMPROVES THE SPEED AND RESPONSIVENESS OF THE ATO BUT REVOLUTIONIZES THE COMMANDER'S CAPABILITY FOR INFLUENCING MANAGEMENT OF HIS TACTICAL AIR FORCES. THIS CAPABILITY WILL BECOME ABSOLUTELY REQUIRED IN RESPONDING TO THE CHALLENGES FACING TACAIR EMPLOYMENT IN THE NEAR FUTURE.

ACKNOWLEDGEMENTS

MY DEEPEST THANKS TO COL. CHUCK LINK, COMMANDER, 603RD TACC SQUADRON AND 314TH AIR DIVISION DIRECTOR OF COMBAT OPERATIONS. HIS ACTIVE COOPERATION PROVIDED NECESSARY ACCESS TO THE CURRENT CAFMS DEVELOPMENT. HIS SAGE ADVICE AND COUNSEL, PARTICULARLY ON INTEGRATION OF THIS NEW CAPABILITY TO MEET THE COMMANDERS NEEDS, WERE AN INVALUABLE ADDITION TO THIS PAPER.

TO MAJOR PETE CROSSMAN, CHIEF, WWMCCS BRANCH, COMBAT PLANS, 603 TACC SQUADRON, I OWE A DEEP DEBT OF GRATITUDE. SELDOM, WHEN DEALING IN CONCEPTUAL WRITING DOES ONE ALSO HAVE THE CHANCE TO SEE THE BIRTH. PETE, STARTING FROM MY ORIGINAL DRAFT SCRIBBLINGS, PRODUCED DEMONSTRATION SOFTWARE ON WWMCCS FRAG II THAT CONTRIBUTED SUBSTANTIALLY TO DEVELOPMENT OF THE FINAL PRODUCT.

1.0 INTRODUCTION

1.1 FEW WOULD ARGUE WITH THE INTRODUCTION OF THE GROUND ATTACK AIRCRAFT HAVING CHANGED DRAMATICALLY THE CHARACTER OF MODERN WARFARE. THOSE EARLY MILITARY AVIATION PIONEERS SAW CLEARLY THE UNIQUE QUALITIES THAT AIRPOWER BROUGHT TO THE BATTLEFIELD: MOBILITY, FLEXIBILITY AND MASS. ULTIMATE MOBILITY, GREATER FLEXIBILITY AND MASS FIREPOWER SUPERIOR TO ANY OTHER WEAPON. ONE FOUR SHIP FLIGHT OF F-4S CAN DELIVER 50,000LBS OF HIGH EXPLOSIVE BOMBS OVER A PERIOD OF LESS THAN ONE MINUTE ON ANY TARGET WITHIN MANY THOUSAND SQUARE MILES OF ENEMY TERRITORY. THE KINDS OF MUNITIONS AVAILABLE OFFERS A WIDE RANGE OF STRATEGIES FROM OUTRIGHT DESTRUCTION (BOMBS) TO AREA DENIAL (MINES), PINPOINT ACCURACY (RETARDED MUNITIONS) TO WIDE AREA EFFECTS (CBU). MODERN TECHNOLOGY HAS BROUGHT NIGHT ALL WEATHER CAPABILITY. FUTURE DEVELOPMENTS PROMISE EVEN GREATER CAPABILITY TO SEE AND ATTACK THE ENEMY UNDER CONDITIONS IMPOSSIBLE TO CONCEPTUALIZE ONLY A FEW YEARS AGO.

1.2 WITH ALL THESE ADVANCES, THE CAPABILITY OF AIRPOWER TO REACT TO FLEETING LUCRATIVE TARGETS, EXPLOIT ENEMY WEAKNESS AND FRIENDLY FORCE SUCCESSES, RAPID CHANGES IN STRATEGY (OURS AND THAT OF THE ENEMY), HAS COMPARATIVELY NOT YET EMERGED FROM THE STONE AGE. OUR CAPABILITY IS ONLY AS GOOD AS OUR SYSTEM FOR ORDERING THE DESIRED CHANGES TO EXPLOIT OPPORTUNITY, NEUTRALIZE, SURPRISE OR SEIZE THE INITIATIVE. THE PRIMARY MEANS FOR THIS ORDERING IS CALLED THE AIR TASKING ORDER (ATO) OR THE "FRAG ORDER" (SEE NOTE 1). WHEN THE FRAG ORDER BECOMES AS FLEXIBLE AS THE AIR WEAPON IT COMMANDS, WE WILL HAVE ACHIEVED THE PROPER BALANCE. THE CURRENT MANUAL FRAG GENERATION SYSTEM AND ITS NEAR TERM PLANNED IMPROVEMENTS FALL FAR SHORT OF THIS GOAL.

1.3 EXPERIENCE DURING SIMULATED COMBAT EXERCISES (TEAM SPIRIT AND FOCUS LENS), OPERATIONAL READINESS EXERCISES/INSPECTIONS AND NUMEROUS OTHER EXERCISES OF THE ATO (FRAG) CYCLE IN THE COMBAT PLANS DIVISION OF THE 603RD TACC HAS PROVED THE NEED FOR SHORTENING THE FRAG ORDER GENERATION CYCLE. FIGURE 1 DEPICTS THE GENERATION CYCLE FOR A TYPICAL FRAG ORDER FOR THE OFFENSIVE AIR SUPPORT (OAS) AND OFFENSIVE COUNTERAIR (OCA)/INTERDICTION STRIKE (INTSTK) PORTION OF THE AIR BATTLE. THE TIME CONSUMMING, INTRICATE PLANNING WHICH GOES INTO FORMING THESE FRAGS TAKES APPROXIMATELY 20 HOURS, CULMINATING IN TRANSMISSION 10 HOURS PRIOR TO ITS EFFECTIVITY TO ALLOW TIME FOR RECEIPT AT USERS LOCATIONS, POSTING, AND GENERATION OF THE NECESSARY AIRCRAFT. THE STARTING POINT FOR GENERATION OF THE FRAG IS THE JOINT/COMBINED COMMANDER'S (CINC) AND THE AIR COMPONENT COMMANDER'S (CACC) DECISIONS DIVIDING THE AIR ASSETS AMONG THE VARIOUS TASKS IN ACCORDANCE WITH CAMPAIGN STRATEGY AND RESULTS OF THE BATTLE TO DATE. CURRENTLY, THESE DECISIONS MUST BE MADE MORE THAN A DAY BEFORE THEY ARE IMPLEMENTED IN ORDER TO ALLOW TIME FOR GENERATION AND DISSEMINATION OF THE FRAG. ON A FLUID BATTLEFIELD, OFTEN THE COMMANDER DESIRES TO ALTER HIS APPORTIONMENT/ ALLOCATION TO EXPLOIT BREAKTHROUGHS AND ENEMY WEAKNESS OR OTHER CURRENT EVENTS. LIMITATIONS OF THE CURRENT MANUAL FRAG GENERATION SYSTEM MAKE IT UNABLE TO REACT READILY TO SHORT NOTICE REQUIREMENTS CHANGES. LATE PUBLICATION OF THE FRAG IS OFTEN THE RESULT, WITH DETERIORATED EFFICIENCY OF THE TACS AS A RESULT. AUTOMATION OF THE FRAG CYCLE OFFERS PROMISE OF RAPID RESPONSE TO LATE CHANGES IN THE BATTLE STRATEGY WHILE STILL PUBLISHING A TIMELY FRAG ORDER.

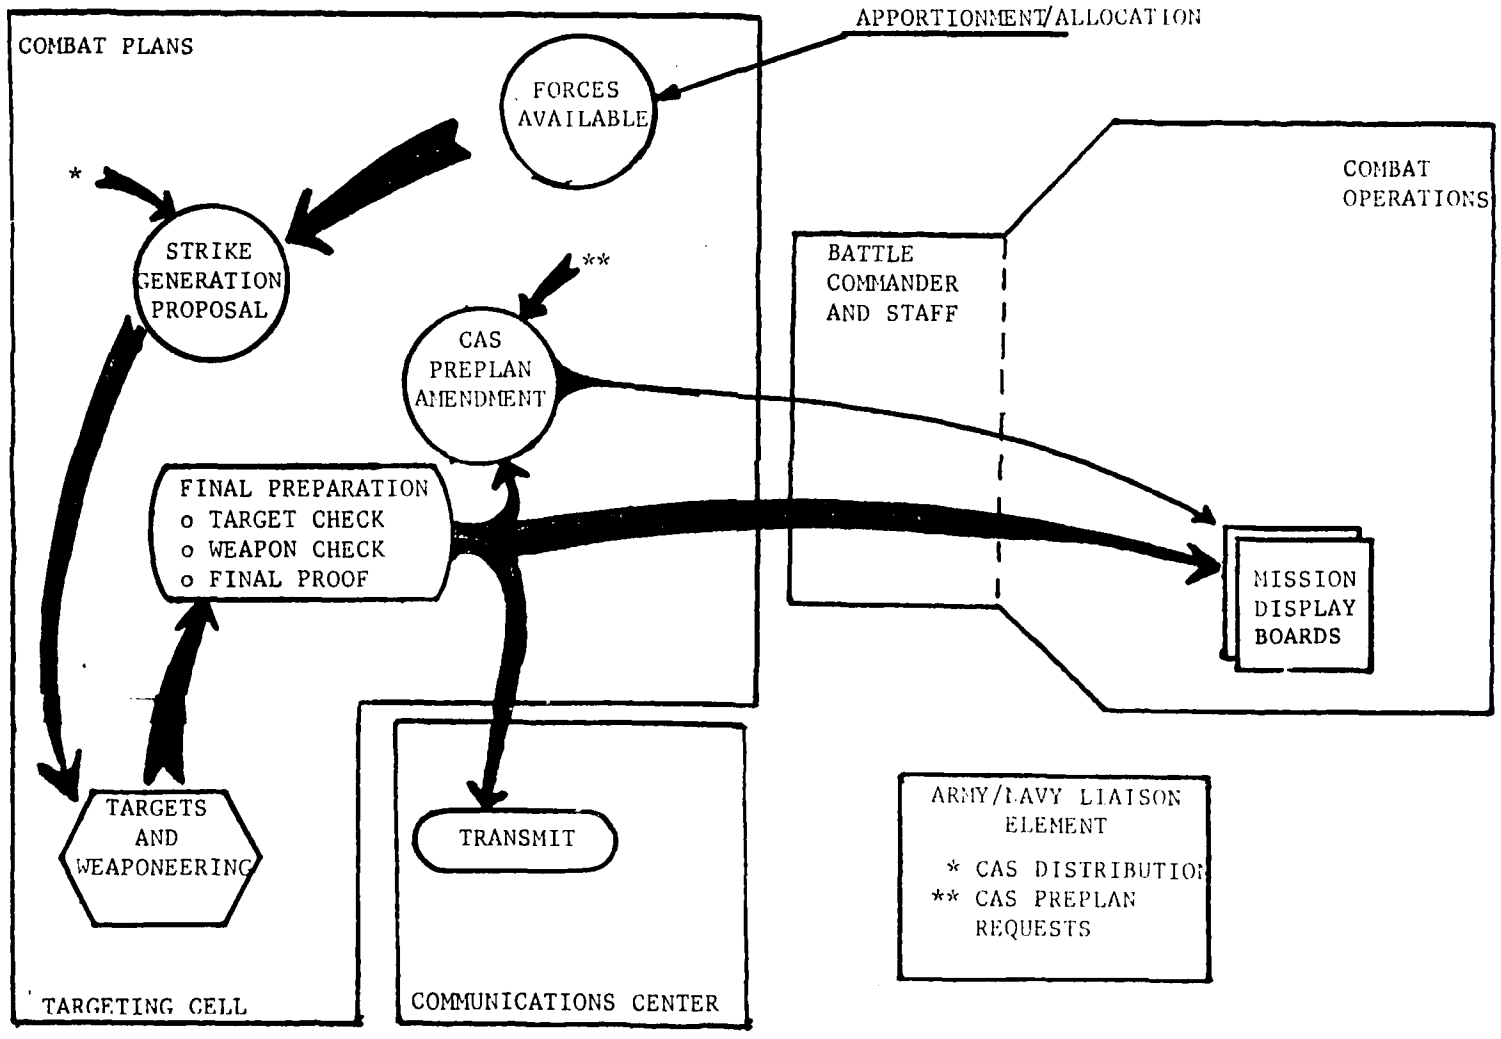

FIGURE 1. TYPICAL MANUAL ATO GENERATION CYCLE
(GENERATION TIME 20 HOURS)

1.4 CURRENT EFFORTS TOWARD IMPROVEMENT

THE CURRENT EFFORT BY HQ TAC AND THE TAFIG TO IMPROVE THE RESPONSE CAPABILITY OF THE TACS THROUGH USE OF COMPUTERS IS CALLED THE COMPUTER ASSISTED FORCE MANAGEMENT SYSTEM (CAFMS). THE PRESENT STATE OF CAFMS DESIGN PROVIDES A SYSTEM FOR RAPID DISSEMINATION OF THE FRAG. CAFMS VIRTUALLY REPLACES THE WORLD WIDE MILITARY COMMAND AND CONTROL SYSTEM (WWMCCS) AND THE COMMUNICATIONS CENTER AS THE PRIMARY MODE OF TRANSMITTING THE FRAG. IT DOES NOT HOWEVER, PROVIDE THE COMPUTER TOOLS TO ACTUALLY GENERATE THE FRAG ORDER. THAT TASK REMAINS A MANUAL, HAND-DRAWN DOCUMENT UNTIL FINALIZED AND ENTERED INTO CAFMS AS IS DONE WITH WWMCCS NOW.

1.5 PURPOSE

THIS PAPER PRESENTS PROPOSALS FOR COMPUTER APPLICATIONS SOFTWARE IN THE FORM OF A FUNCTIONAL DESCRIPTION OF HOW A COMPUTER ASSISTED FRAG ORDER GENERATION WOULD PERFORM. COMPUTER GENERATION OF THE FRAG IS AN ATTAINABLE GOAL. THE STEPS, OR STAGES, OF THE FRAG GENERATION CYCLE ARE DEFINABLE. EACH HAS A SET OF NUMERICAL COMPUTATIONS OR RELATIONSHIPS AND AN ASSOCIATED INFORMATION DATA BANK PROVIDED FROM WITHIN THE FRAG SHOP OR OTHER FUNCTIONAL OFFICES WITHIN THE TACC. USING A COMBINATION OF COMPUTER CALCULATIONS AND VISUAL PRESENTATIONS WITH A HUMAN OPERATOR LINK OR PROGRAMMED SEARCH MODULE, TO THE INFORMATION DATA BANKS, THE COMPUTER CAN BE HARNESSED TO ASSIST IN PREPARATION OF FRAG ORDERS. DEVELOPMENT OF THIS COMPUTER ASSISTED FRAG GENERATION AS A PART OF THE CONSTANT WATCH PHASE III (OR EARLIER ON FRAG IT SOFTWARE), OR AS AN INTEGRATED PART OF CAFMS PROMISES SHORTENING THE FRAG GENERATION CYCLE FROM 20 HOURS TO APPROXIMATELY ONE-THIRD OF THAT TIME. SHORTENING THE ENTIRE FRAG GENERATION/

DISSEMINATION CYCLE TO APPROXIMATELY 6 HOURS PROVIDES THE AIR BATTLE COMMANDER WITH THE OPPORTUNITY TO EXPRESS TODAYS STRATEGY AND OBJECTIVES FOR TOMORROW'S WAR THRU THE FRAG ORDER, A QUANTUM ADVANCE IN THE STATE OF THE ART.

1.6 APPROACH

THE FOLLOWING DISCUSSION IS GEARED TO PRODUCTION OF THE DAS AND OCA/INT (SEE NOTE 2) FRAG ORDERS SINCE THESE ARE THE MOST INTRICATE, COMPLEX AND TIME CONSUMING FRAGS TO PRODUCE. THE NUMBERS USED IN THIS EXAMPLE ARE FICTICIOUS BUT CLOSE ENOUGH TO REALITY TO BE USEFUL. BECAUSE THE SUBJECT FRAGS DEAL WITH OUR FRIENDLY FORCES ATTACKS ON ENEMY TERRITORY, THEY MUST ORCHESTRATE THE EFFORTS OF DIVERSE MISSION GROUPS IN OUR HIGH TECHNOLOGY AIR COMBAT FORCE. THIS MUST BE DONE WHILE KEEPING THE STRIKE SET WITHIN A SMALL TIME WINDOW AND LIMITED STRIKE AREA TO PRESERVE MASS AND MUTUAL SUPPORTABILITY. STRATEGY MAY REQUIRE CONSTANT PRESSURE ON THE ENEMY THEREFORE A SUCCESSION OF STRIKE SETS MUST BE PRODUCED ON AN AROUND THE CLOCK BASIS. ALTERNATIVELY THE SYSTEM MUST BE ABLE TO ADJUST TO THE SINGLE, LARGE FORCE (OR "GORILLA") STRIKE STRATEGY. OFFENSIVE FORCES, BECAUSE THEY STRIKE INTO ENEMY TERRITORY, ARE FORMED INTO STRIKE PACKAGES OR SETS. EACH PACKAGE OR SET HAS A MIX OF FORCES (STRIKERS, CAP, AIR DEFENSE SUPPRESSION) FOR MUTUAL SUPPORT AND PROTECTION. THE ORCHESTRATION OF FORCES IN THE RIGHT AMOUNTS AND WITHIN THE CAPACITY OF OUR FORCE GENERATION CAPABILITY WHILE MEETING BATTLE OBJECTIVES IS WHAT THE FRAGGER'S TASK IS ALL ABOUT. IN FORMING EACH SET THE MAN-MACHINE SYSTEM MUST ACCOMMODATE LIMITING FACTORS SUCH AS: THE CAPABILITY OF FRIENDLY

FORCES TO GENERATE AIRCRAFT AND CREWS, WEATHER PATTERNS, TARGET PRIORITIES, CONSIDERATION OF ENEMY STRENGTH, EXPLOITATION OF HIS WEAKNESS; AMONG OTHERS. A FRAGGER, ASSISTED BY THE COMPUTER WILL BE FREED OF TIME CONSUMING CALCULATIONS AND HAVE THE NECESSARY DATA AND DISPLAYS AT HAND TO APPLY FULL EFFORT TO SOLVING COMPLEX TACTICAL PROBLEMS, IMPLEMENTING NUANCES OR RADICAL CHANGES OF STRATEGY AND STILL PRODUCE THE FRAG IN A FRACTION OF THE CURRENT TIME REQUIRED. THE DESCRIPTIONS GIVEN IN SECTION THREE ASSUME OPERATIONS OF A FULL UP APPLICATIONS SOFTWARE SET.

1.7 OPERATIONS CONCEPT

FIGURE 2 DEPICTS THE FUNCTIONAL OFFICES IN THE TACC WHICH CONTRIBUTE TO GENERATION OF THE FRAG ORDER. EACH DATA REPORTING ACTIVITY REPORTS THE STATUS OF ITS RESPONSIBLE AREA AT REGULAR INTERVALS OR AS SIGNIFICANT CHANGES OCCUR. THESE REPORTS UPDATE DISPLAYS WHICH ARE CALLED UP BY THE FRAGGER DURING VARIOUS STEPS OF FRAG GENERATION. FIGURE 3 DEPICTS THE SERIES OF STEPS AND DATA INPUTS WHICH COMPRISE THE COMPUTER ASSISTED FRAG GENERATION CYCLE. AT APPROPRIATE TIMES THE FRAGGER ENTERS NUMERICAL DATA OR PROGRAM INSTRUCTIONS WHICH RESULT IN FORMATED DISPLAYS TO ACCOMPLISH THE NEXT STEP. ALL ALONG THE WAY IN APPROPRIATE PLACES, THE FRAGGER PICKS DATA OFF SUPPORTING INFORMATION DISPLAYS OR INSTRUCTS THE MACHINE TO EXECUTE A SEARCH AND SELECT PROGRAM TO COMPLETE THE FRAG FORMAT DISPLAY. DURING FORMATION OF THE STRIKE GENERATION MATRIX AND AGAIN JUST BEFORE TRANSMITAL TO USERS, THE AIR BATTLE COMMANDER IS CONSULTED/BRIEFED ON FRAG STRATEGY/ACCOMPLISHMENT.

DURING OTHER STEPS, CONSULTATION WITH COLLATERAL OFFICES OR THE BATTLE COMMANDER MAY BE ACCOMPLISHED BY CCTV OR JOINT VIEWING OF THE CRT AND PHONE COMMUNICATIONS. FINAL REVIEW OF THE FINISHED PRODUCT MAY BE ACCOMPLISHED BY CONFERENCE PHONE AND COMMON VISUAL DISPLAY. IDEALLY THE AIR BATTLE COMMANDER WILL BE BRIEFED/ CONSULTED IN A CONFERENCE ROOM USING A LARGE PICTORIAL GRAPHICS DISPLAY OF THE AIR/GROUND SITUATION OVERLAYED WITH THE FRAG PICTORIAL. DISCUSSIONS BETWEEN THE ATF BATTLE COMMANDER AND ACTION OFFICERS OF HIS TACTICAL EXPLOITATION TEAM (NOTE 5) AT AN INITIAL MEETING WILL FORM THE STRIKE GENERATION MATRIX AND TARGETING STRATEGY. A FINAL MEETING WILL CAPSULE THE RESULTANT FRAG AND REQUEST AUTHORIZATION FOR RELEASE. NOTE THE RADICAL DIFFERENCES BETWEEN FIGURES 1 AND 3. COMPUTER ASSISTANCE HAS PROVIDED THE MEANS TO GET THE COMMANDER AND THE DIRECTOR OF COMBAT OPERATIONS ACTIVELY IN THE FRAG GENERATION LOOP. IT HAS ALSO PROVIDED A MEANS TO USE DETAILED STRATEGY AND OBJECTIVES PLANNING TO FORM THE APPORTIONMENT/ALLOCATION DECISION BRIEFINGS, RATHER THAN THE OTHER WAY AROUND.

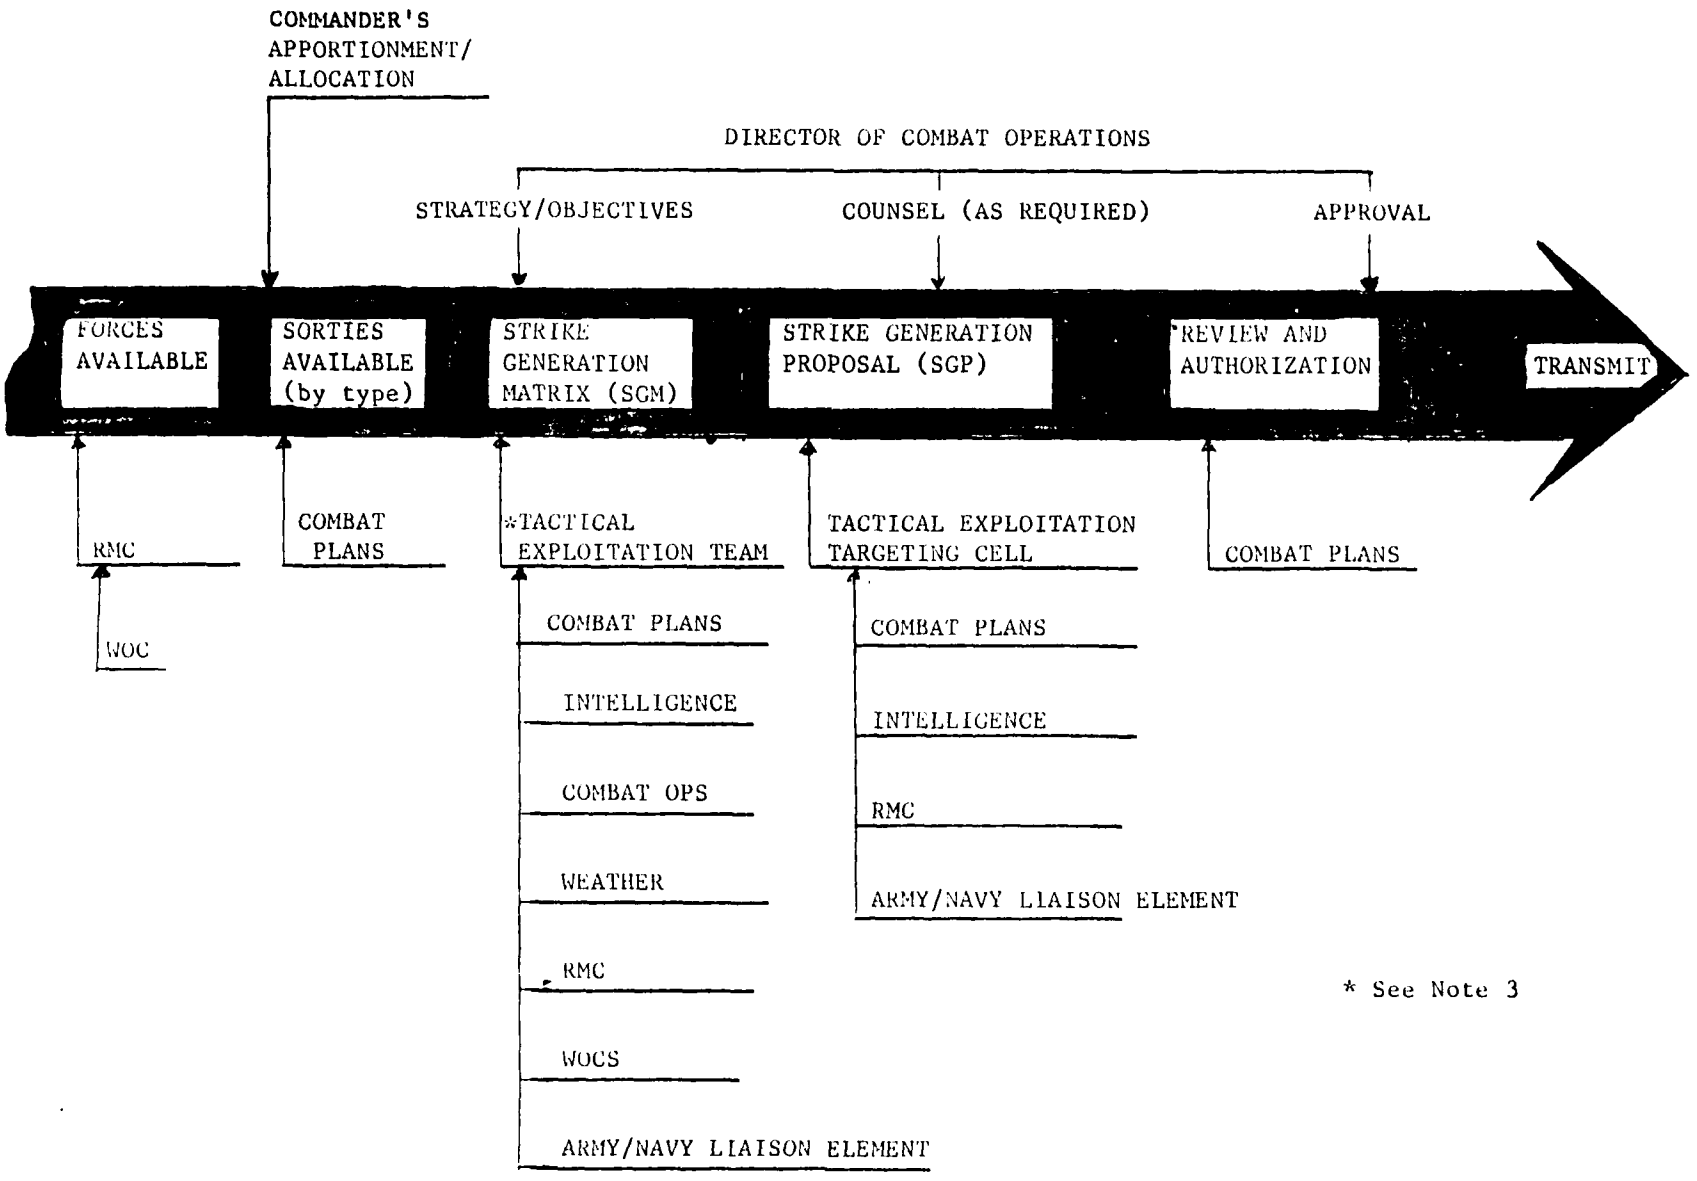

FIGURE 2. FUNCTIONAL OFFICES CONTRIBUTING TO ATO GENERATION

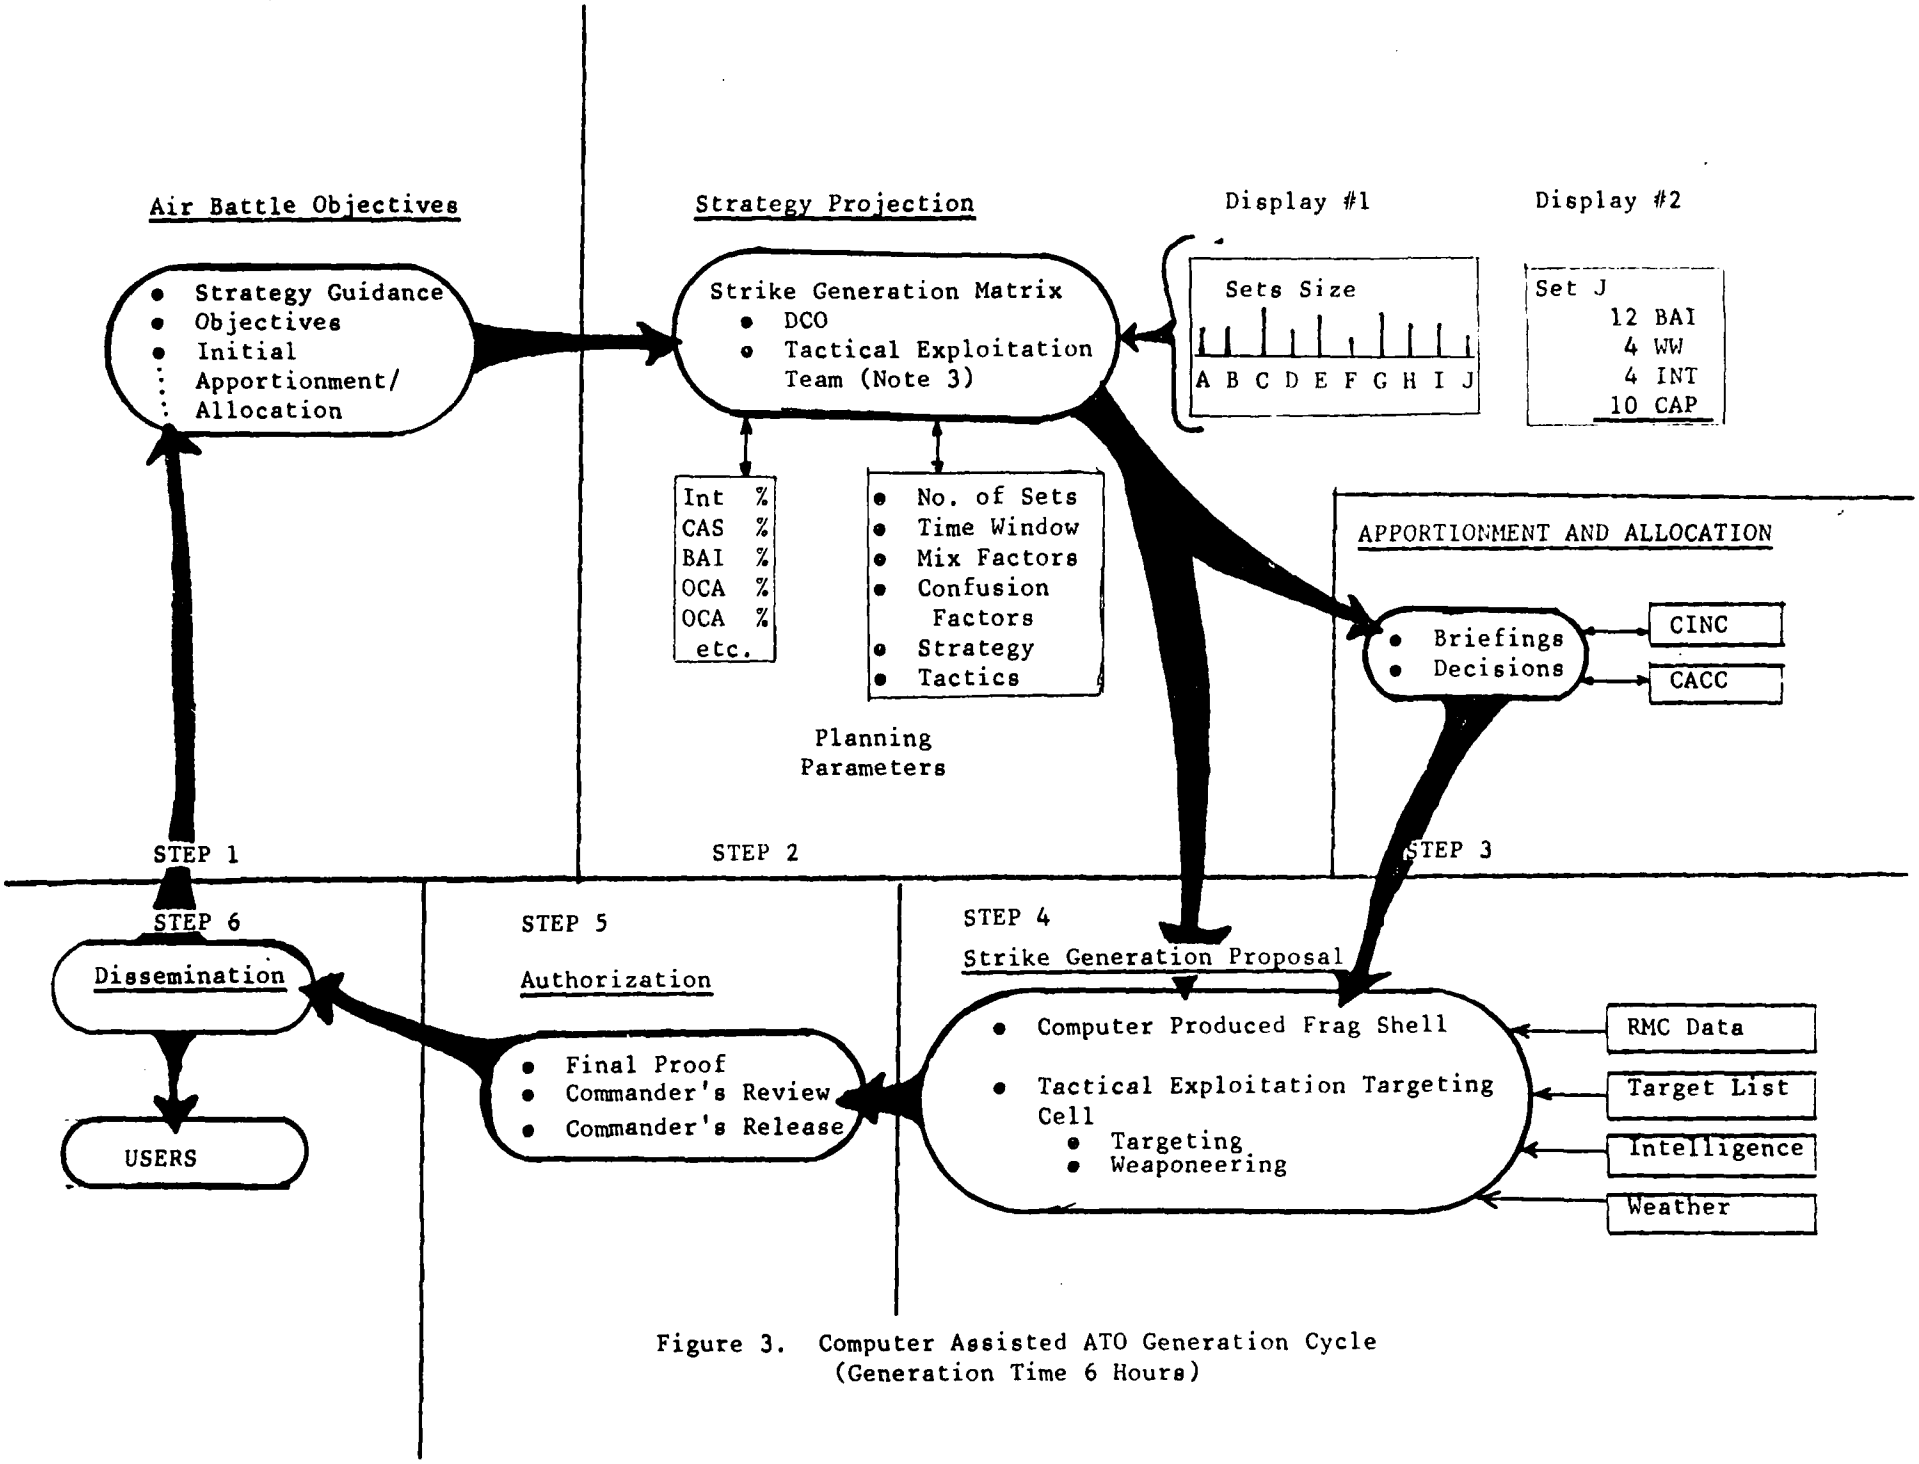

Figure 3. Computer Assisted ATO Generation Cycle
(Generation Time 6 Hours)

2.0 DATA SOURCES

TO PROVIDE PARAMETER INPUTS FOR EXECUTION OF ALGORYTHMS NECESSARY TO FRAG GENERATION, THE FOLLOWING ACTIVITIES WILL BE SOURCES OF DATA:

2.1 THE JOINT OR COMBINED FORCE COMMANDER GIVES DIRECTION ON AIR FORCES APPORTIONMENT.

2.2 AIR COMPONENT COMMANDER (CACC) DETERMINES ALLOCATION OF AIR FORCES AND PROVIDES GUIDANCE ON STRATEGY IN EMPLOYMENT OF THE AIR ARM TO ACHIEVE THE CINC'S OBJECTIVES.

2.3 THE DIRECTOR OF COMBAT OPERATIONS PROVIDES SPECIFIC GUIDANCE AND ARTICULATES OBJECTIVES TO IMPLEMENT THE COMMANDERS' GUIDANCE.

2.4 TACTICAL EXPLOITATION TEAM.

THE COMMANDER WITH ASSISTANCE FROM THIS GROUP OF EXPERTS FROM THE OPERATIONS, PLANS AND INTELLIGENCE COMMUNITIES DEVISES THE COHERENT ATTACK AND TARGETING STRATEGY TO NEUTRALIZE THE ENEMY THREAT, ACHIEVE TACTICAL ADVANTAGE AND SEIZE THE INITIATIVE.

2.5 WOCS

WING OPERATIONAL CENTER (WOCS) REPORT NUMBER OF AIRCRAFT OPERATIONALLY READY AND AIRCRAFT/AIRCREWS AVAILABLE FOR OPERATIONS DURING THE NEXT FRAG PERIOD. REPORTS INCLUDE SORTIE GENERATION CAPABILITY IN NORMAL AND SPECIALTY WEAPONS SUCH AS 'PAVE TACK' AND 'MAVERICK'. THIS DATA IS GATHERED AND SUMMARIZED AS REQUIRED BY RMC.

2.6 THE RESOURCE MANAGEMENT CENTER (RMC) PROVIDES CURRENT STATUS ON STOCKS OF AVAILABLE MUNITIONS AND POL AT EACH BASE, STATUS OF AUGMENTATION FORCES, DELIVERY/ARRIVAL SCHEDULES AS WELL AS CURRENT O/R STATUS FOR EACH UNITS AIRCRAFT/AIRCREWS.

2.7 ARMY/NAVY LIAISON OFFICE PROVIDES DISTRIBUTION GUIDANCE FOR CAS SORTIES AMONG THE SURFACE MANEUVER UNITS. REQUESTS FOR PREPLANNED AIR SUPPORT TO SURFACE UNITS ARE GATHERED HERE AND FORWARDED TO COMBAT PLANS.

2.8 INTELLIGENCE DIVISION PROVIDES TARGET INTELLIGENCE, TARGET LISTS AND ADDITIONAL EXPERTISE ON TARGETING AND WEAPONEERING.

2.9 COMBAT OPERATIONS PROVIDES FEEDBACK ON SUCCESS OR FAILURE OF THE FRAG ORDER BOTH TO THE DIRECTOR OF COMBAT OPERATONS AND COMBAT PLANS TO ENABLE IMPROVEMENTS IN FRAG EFFECTIVENESS, AND PROVISION OF DATA BASE FOR REVISED APPORTIONMENT RECOMMENDATIONS.

2.10 THE WEATHER SHOP PROVIDES PREDICTIONS OF BATTLE AREA AND INTERDICTION AREA TARGET WEATHER.

2.11 COMBAT PLANS PROVIDES THE EXPERTISE IN EMPLOYMENT OF TACTICAL WEAPONS SYSTEMS, TARGETING AND MUNITIONS WHICH ENABLE THE WEDDING OF ALL THE ABOVE DATA INTO AN ORCHESTRATED AIR ATTACK DESCRIBED BY THE OAS AND OCA/INT FRAG ORDERS.

3.0 PROCEDURES

THE DISTINCT STEPS IN COMPUTER ASSISTED GENERATION OF THE DAILY FRAG ORDER ARE DEPICTED IN FIGURE 3. THE FOLLOWING ARE DETAILED PROCEDURES TO BE CARRIED OUT BY THE FRAG ORDER PRODUCER. EACH STEP IS ASSISTED BY COMPUTER APPLICATIONS SOFTWARE PROGRAMS AND INTERACTIVE DISPLAYS. THE FRAGGER FOLLOWS "COOK BOOK" PROCEDURES FOR MUNDANE OPERATIONS, SELECTING INFORMATION FROM VARIOUS DATA BANKS AND ENTERING IT INTO THE DISPLAY. FOR ROTE OPERATIONS, COMPUTER PROGRAMS MAY INDEX THRU DATA BANKS TO SUPPLY THE NEEDED ENTRIES. FRAGGER EXPERTISE IS EXERCISED IN SELECTION OF SUPPORT DATA, ADJUSTMENT OF RESULTS FOR REAL WORLD COMPLEXITY AND INTRODUCTION OF NEW OR UNQUANTIFIED DATA. AT APPROPRIATE POINTS THE COMPUTER EXECUTES AN APPLICATIONS PROGRAMS WHICH MOVES THE PROCESS TO THE NEXT STEP. THE DEFINABLE STEPS FOR PURPOSE OF THIS PAPER ARE:

STEP 1 AIR BATTLE OBJECTIVES

STEP 2 STRATEGY PROJECTION/STRIKE GENERATION MATRIX DEVELOPMENT.

STEP 3 APPORTIONMENT AND ALLOCATION

STEP 4 STRIKE GENERATION PROPOSAL (FRAG SHELL DEVELOPMENT)

STEP 5 AUTHORIZATION

STEP 6 DISSEMINATION

3.1 STEP 1 AIR BATTLE OBJECTIVES

AFTER REVIEWING THE CURRENT SITUATION FROM THE VARIOUS SOURCES AVAILABLE TO HIM, THE AIR BATTLE COMMANDER(ABC) AND/OR HIS DEPUTY FOR COMBAT OPERATIONS(DCO) CONVENES THE TACTICAL EXPLOITATION TEAM. THE COMMANDER/DIRECTOR AND HIS EXPLOITATION STAFF REVIEW DATA ON RESULTS OF THE BATTLE TO DATE AND STATUS OF FORCES AVAILABLE FOR THE AIR WAR. THEY THEN DISCUSS AND ARTICULATE OBJECTIVES OF TOMORROW'S EFFORT. ASSISTANCE IS PROVIDED BY COMPUTER GENERATED GRAPHICS PROJECTED ON THE CONFERENCE ROOM VIEWING SCREEN. THEY THEN SET THEMSELVES TO APPLYING FRIENDLY FORCES TO ACCOMPLISH THE OBJECTIVES. TWO DATA BASES MUST BE MERGED TO PRODUCE A TRUE PICTURE OF HOW MANY SORTIES OF EACH KIND ARE AVAILABLE TO BE FRAGGED. THESE TWO DATA BASES ARE (A) THE PROJECTED STATUS OF FORCES AND (B) INITIAL ESTIMATED APPORTIONMENT AND ALLOCATION. (THE PROGRAM CAN START WITH YESTERDAY'S APPORTIONMENT/ALLOCATION FIGURES OR NEW ESTIMATED FIGURES).

3.1.1 PROJECTED STATUS OF FORCES

WOCS ARE RESPONSIBLE TO REPORT NUMBERS OF MISSION READY AIRCRAFT AND AIRCREWS. THE DIRECTOR OF COMBAT OPERATIONS MANDATES THE SORTIE RATE FOR EACH AIRCRAFT TYPE. WOCS ALSO REPORT SPECIALIZED WEAPONS SORTIES AVAILABLE. WOC DATA IS REPORTED AND ENTERED AT REGULAR INTERVALS OR AS CHANGES OCCUR. FACTORS WHICH AFFECT THIS DATA ARE: COMBAT LOSSES, MAINTENANCE CAPABILITY, TURNAROUND CAPABILITY, AUGMENTATION STATUS, ETC.

3.1.2 APPORTIONMENT, ALLOCATION AND DISTRIBUTION

THE EMPLOYMENT OF AIR FORCES AS PART OF THE AIR/GROUND/ NAVAL/JOINT/ COMBINED OPERATION IS THE RESPONSIBILITY OF THE CACC AS APPROVED BY THE CINC. EACH DAY THE CACC STAFF ASSESSES THE RESULTS OF THE BATTLE AND RECOMMENDS APPORTIONMENT OF AIR ASSETS TO SUPPORT OVERALL BATTLE STRATEGY FOR TOMMORROW. THESE APPORTIONMENT AND ALLOCATION CATAGORIES ARE:

APPORTIONMENT (CINC)	ALLOCATION (CACC)
* COUNTER AIR	* DEFENSIVE COUNTER AIR (DCA)
	* OFFENSIVE COUNTER AIR (OCA)
* OFFENSIVE AIR SUPPORT (OAS)	* CLOSE AIR SUPPORT (CAS)
	* BATTLEFIELD AIR INTERDICTION (BAI)
* INTERDICTION (INT)	* INTERDICTION (INT)

THE GROUND COMPONENT COMMANDER DISTRIBUTES OASCAS AMONG THE VARIOUS FIELD COMMANDS. THE NAVAL COMPONENT COMMANDER (IF SUPPORTED BY AIR FORCE ASSETS) DOES LIKEWISE FOR HIS SURFACE UNITS. THIS DISTRIBUTION REFLECTS PRIORITY TARGET SERVICING REQUIREMENTS AS EXPRESSED IN CURRENT OPLANS AND OPORDS. REQUEST FOR PREPLANNED AIR SUPPORT ARE HONORED ACCORDING TO THIS DISTRIBUTION.

3.1.3 SORTIES AVAILABLE COMPUTATION

THIS ALGORYTHM PRODUCES A FIGURE FOR SORTIES AVAILABLE BY TYPE OF MISSION:

A. AIR TO AIR (A/A)

(1) DCAINT

(2) UCACAP

B. AIR TO GROUND (A/G)

(1) UASBAI

(2) UASCAS

(3) UCASTK

(4) DCAWW

(5) INTSTK

3.1.3.1 PARAMETERS CONSIDERED (FROM WCC/RMC DATA BANKS)

A. UNIT DESIGNATION (WING/SQUADRON)

B. NUMBER OF AIRCRAFT O/R

C. DEDICATED AIRCRAFT APPLICATIONS (E.G. WILD WEASEL)

D. DEDICATED UNIT MISSION (A/A VS A/G)

E. SECONDARY UNIT MISSION/LIMITS (A/G VS A/A, AIRCRAFT CONVERSION KITS ON HAND, CREW PROFICIENCY)

F. SPECIAL UNIT CAPABILITY (E.G. PAVE TACK, MAVERICK)

G. UNIT/BASE SORTIE GENERATION CAPABILITY (I.E. SMOUTH FLOW AND SURGE SORTIE RATE, QUICK TURN CAPABILITY)

H. SPECIAL CONSIDERATIONS (E.G. UNIT HELD IN RESERVE, MISSION CHANGEOVER, ORDER OF PRIORITY FOR MISSION CHANGEOVER)

I. TASKED SORTIE RATE

3.1.3.2 SAMPLE DATA INPUT

ASSUME WE ARE LISTING THE 603RD TFS WHICH IS PART OF THE 314TH TFW: THE ENTRY FOR THIS UNIT WOULD LOOK LIKE THIS:

A. 314 - 603 (UNIT DESIGNATION)

B. 15 F-4E (AIRCRAFT D/R)

C. NONE (NO SPECIALIZED APPLICATION)

D. A/A 15 (ALL INTERCEPTORS)

E. A/G 7 (7 CAN BE CONVERTED TO A/G MISSION)

F. P/T 5 (5 CAN BE CONVERTED TO A/G AND TASKED FOR PAVE TACK)

G. USAN 20/40

603 6/12

(PHYSICAL TURNAROUND/SORTIE GENERATION LIMITS AT USAN 20 MSN/HOUR SMOOTHFLOW, 40 MSN/HOUR 3 DAY SURGE)

(603 SQUADRON IS ALLOCATED 6 SORTIES/HOUR SMOOTHFLOW, 12 MSN/HOUR SURGE AS ITS SHARE OF CAPABILITY AMONG THE SEVERAL SQUADRONS USING USAN FACILITIES)

H. PRIORITY 3 (THIRD IN PREFERENCE FOR CONVERSION TO THE A/G MISSION. TWO OTHER SQUADRONS WILL BE CONVERTED TO A/G BEFORE THE 603RD)

I. 5.0 SURGE (TASKED SORTIE RATES)

2.0 SMOOTHFLOW

THIS DATA IS GATHERED AND STORED FOR EACH SQUADRON. EACH FILE IS USED THROUGHOUT THE COMPUTER ASSISTED FRAG CYCLE TO AUTOMATICALLY TASK A/A SORTIES UNTIL MAX SORTIE RATES ARE REACHED. THE PROGRAM MAY AUTOMATICALLY DRAW DOWN A/A SORTIES AND TASK THEM FOR A/G SORTIES ON A PRESET PRIORITY BASIS AS ATTRITION OR CHANGING STRATEGY DICTATES. BUILT IN WARNING FLAGS ARE ILLUMINATED AS LIMITS ARE REACHED OR SPECIAL ACTIVITIES (SUCH AS A/C CONFIGURATION CHANGE) ARE DEMANDED.

3.1.3.3 SAMPLE FINAL COMPUTATION FOR STEP 1

THE REQUIRED COMPUTATION IS:

FORCES AVAILABLE AT EACH UNIT TIMES SORTIE RATE SUMMED OVER ALL ASSIGNED UNITS. A SAMPLE RESULT IS:

	UNIT	TASKING	PRIMARY MISSION
A.	WING A	400 SORTIES	A/A
	WING B	300 SORTIES	A/G
	WING C	300 SORTIES	A/G
	WING D	100 SORTIES	A/G
	WING E	200 SORTIES	A/G
		300 SORTIES	A/A
	WING F	400 SORTIES	A/A
		100 SORTIES	A/G
		200 SORTIES	A/A
		2300 TOTAL AVAILABLE	

B. INITIAL (OR GOING-IN) POSITION ON APPORTIONMENT/ALLOCATION.

THE AMC/DCO BASED ON AIR OBJECTIVES DISCUSSIONS DETERMINES AN INITIAL ESTIMATED APPORTIONMENT AND ALLOCATION FOR A GOING-IN POSITION TO STEP 2. UNLESS A SIGNIFICANT CHANGE OF OBJECTIVES HAS OCCURED, THE CURRENT APPORTIONMENT/ALLOCATION FIGURES WILL BE USED. THE PURPOSE FOR THIS ESTIMATION IS TO GIVE GOING IN POSITION TO START THE COMPUTER ASSISTED FRAG GENERATION.

STEP 2 WILL FORM THE SKELETON OF THE FRAG, FORMING OUR AIR ATTACK IN ACCORDANCE WITH DETAILED CONSIDERATIONS. DURING STEP 2 AND AT ITS CONCLUSION THE COMPUTER AUTOMATICALLY TABULATES SORTIES TASKED BY TYPE AND PRESENTS THE ACTUAL FIGURES RESULTING FROM APPLICATION OF OBJECTIVES. THE RATIONALE FOR ANY DIFFERENCE BETWEEN THE INITIAL AND ACTUAL FIGURES SHOULD BE EVIDENT. ENSUEING DISCUSSIONS WILL FORM A COMPLETE RATIONALE FOR THE APPORTIONMENT/ ALLOCATION RECOMMENDATION. A SAMPLE INITIAL APPORTIONMENT/ ALLOCATION IS:

C/A	50%		460 SORTIES
	OCA	50%	230 SORTIES
	OCA	50%	230 SORTIES (SEE NOTE 5)
DAS	45%		414 SORTIES
	CAS	40%	164 SORTIES
	BAI	60%	250 SORTIES
INT	5%		46 SORTIES
TOTAL			920 SORTIES

D. STEP 1 IS COMPLETE. ENTER THE DATA. AN AUTOMATIC PROGRAM SEARCHES THE DATA FILES. IF THIS APPORTIONMENT CANNOT BE MET WITHOUT RECONFIGURING AIRCRAFT A WARNING MESSAGE IS SHOWN. EXAMPLE:

WARNING: MAX CURRENT A/G TASKING = 800, THIS APPORTIONMENT = 804

INSTRUCTIONS PLEASE!

THE NECESSARY ADJUSTMENT TO INITIAL APPORTIONMENT CAN BE MADE OR A/A FIGHTERS MUST BE RECONFIGURED TO A/G. THIS DATA MUST BE KEPT IN MIND THROUGH PERFORMANCE OF STEP 2.

3.2 STEP 2, STRATEGY PROJECTION: THE STRIKE GENERATION MATRIX (SGM).

THE OBJECTIVE OF THIS STEP IS TO INJECT INTO AIR BATTLE PLANNING, THE STRATEGY GUIDANCE AND OBJECTIVES DESIRED BY THE AIR BATTLE COMMANDER (ABC) OR HIS DIRECTOR OF COMBAT OPERATIONS (DCO). THERE IS A WIDE SPECTRUM OF POSSIBLE APPLICATIONS FOR AIR FORCES DUE TO THEIR FLEXIBILITY, MOBILITY AND DEGREE OF MASS DESIRED. MAXIMUM TONNAGE OF ORDNANCE DELIVERED IS ACHIEVED BY CONTINUOUS TURNAROUND OF AIRCRAFT (SMOOTHFLOW) AT MAXIMUM RATES ALLOWED BY FACILITIES AND HUMAN ENDURANCE. MAXIMUM MASS IS ACHIEVED BY LARGE STRIKE PACKAGES WHICH MAKE SMOOTHFLOW IMPOSSIBLE (SEE NOTE 6). THE FORMATION OF THE STRIKE GENERATION MATRIX WITH PARTICIPATION OF THE ABC OR DCO PROVIDES THE PROPER COMPROMISE WHICH MEETS THE DESIRED AIR BATTLE OBJECTIVES. DURING THE PROCESS OF DECIDING THE DESIRED NUMBER OF STRIKE SETS AND THEIR COMPOSITION TO ACCOMPLISH BATTLE OBJECTIVES, THE ABC OR DCO SIMULTANEOUSLY FORMS THE COMPLETE DEMONSTRATION RATIONALE FOR TOMMORROWS APPORTIONMENT/ALLOCATION RECOMMENDATIONS. STEP TAD IS THEREFORE CLOSELY INTERRELATED WITH STEP ONE. (SEE NOTE 4) COMPUTER ASSISTANCE ENABLES A PROFOUND CHANGE FROM CURRENT, CUT AND TRY ESTIMATION, METHODS FOR ARRIVING AT RECOMMENDED APPORTIONMENT, AND BECOMES A STRONG ARGUMENT FOR DEVELOPMENT OF THE COMPUTER ASSISTED FRAG GENERATION CAPABILITY. DURING FORMATION OF THE MATRIX, THE ABC/DCO EXPRESSES HIS DESIRES IN TERMS OF NUMBER OF STRIKE SETS AND THEIR COMPOSITION TO MEET OBJECTIVES AND STRATEGY. DISCUSSIONS ON STRATEGY AND OBJECTIVES ARE ENCOURAGED DURING THE FORMATION EXERCISE WITH EXPERTS OF THE TACTICAL EXPLOITATION TEAM. TARGETEERS AND WEAPONEERS AS WELL AS FRAGGERS BENEFIT FROM THESE DISCUSSIONS WHICH FACILITATE RAPID COMPLETION OF STEP 3. THE SOFTWARE PROGRAM

KEEPS TRACK OF FORCES AVAILABLE AT PREDETERMINED GENERATION RATES AND LIMITS. WHEN PRESET LIMITS OF FORCE AVAILIBILITY ARE NOT MET A WARNING FLAG ILLUMINATES WITH AN EXPLANATION OF FORCE DEFICIENCY, FORCE RECONFIGURATION REQUIREMENT OR IMPRACTICALLY OF ACCOMPLISHMENT. HERE IS A PROPOSED METHOD BY WHICH THIS MAY BE ACCOMPLISHED:

THE BASIC MATRIX IS FIRST PROGRAMMED ON A BASIS OF 24 HOUR SMOOTHFLOW. PARAMETERS ARE AGREED ON FOR TIME ALLOWABLE BETWEEN AIRCRAFT TAKEOFFS (TURN TIME). BASIC STRIKE SET FORCE MIX IS BASED ON EMPLOYMENT DOCTRINE, STRATEGY AND TACTICS. THESE PARAMETERS ARE ENTERED BY THE FRAGGER INTO THE BASELINE DATA BANK AS PRODUCTS OF CONFERENCES, DATA FROM EXERCISES AND DIRECTION FROM THE COMMANDER. THE FINAL VIDEO PRESENTATION OF THE SMOOTHFLOW SOLUTION LOOKS LIKE THIS:

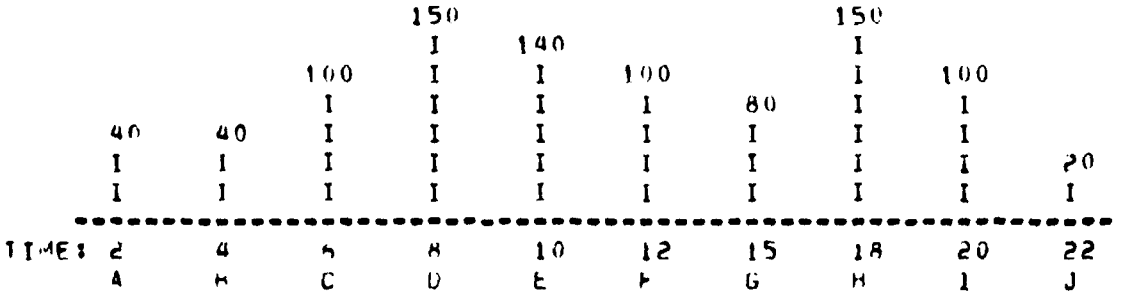

FIGURE 4

THE COMPUTER PROGRAM HAS COMPUTED THE SORTIE REQUIREMENTS FOR TEN STRIKE SETS (A THROUGH J) ACCORDING TO PARAMETERS ENTERED INTO DATA BANKS AND SEARCHED OUT DURING EXECUTION OF THE PROGRAM. 920 SORTIES HAVE BEEN VISUALLY DISPLAYED IN A MAP OF THE 24 HOUR AIR ATTACK. THIS WAS ACCOMPLISHED BY A PROGRAM WHICH CONSIDERED AND USED AS NECESSARY, THE FOLLOWING PARAMETERS:

3.2.1 NUMBER OF STRIKE SETS DESIRED.

THIS IS A ABC/DCO OR FRAGGER VARIABLE INPUT. THE NUMBER OF SRIKE SETS SHOULD VARY FROM DAY TO DAY TO KEEP THE ENEMY OFF BALANCE. THEY SHOULD ALSO BE ADJUSTABLE TO PROVIDE RESPONSIVENESS TO STRATEGY CHANGES. AN ADVANTAGE OF THIS COMPUTER COMPUTATION IS THAT IT CAN BE RUN FOR ANY NUMBER OF STRIKE SETS OVER A 24 HOUR PERIOD TO GIVE A QUICK LOOK AT EFFECTS OF CHANGING THE NUMBER OF STRIKE SETS. LIMITS OF STRIKE SET GENERATION CAPABILITY WILL SOON SHOW UP AS THE LIMITING CASES WHEN TOO MANY OR TOO FEW STRIKE SETS ARE REACHED. THE STRATEGIST CAN VARY THE NUMBER AND SIZE TO SUIT THE BATTLE PLAN. THE MACHINE ADJUSTS THE FORCE GENERATION TO KEEP OUR MANIPULATIONS WITHIN WORKABLE BOUNDS.
CHANGES IN FORCE COMPOSITION AND GENERATION CAPABILITY, PROVIDED IN A RUNNING TABULATION BY THE COMPUTER, SIGNIFICANTLY AID THE STRATEGIST IN PRODUCING AN OPTIMUM ATTACK.

3.2.2 STRIKE SET COMPOSITION PARAMETERS (EXAMPLES):

A. SPECIALIZED TACTICS (E.G. CERTAIN TYPES OF AIR ASSETS WORK IN CONCERT WITH SUPPORTING AIRCRAFT. IN THAT CASE THE ENTIRE TEAM MUST BE FRAGGED INTO THE STRIKE SET.)

B. SOME MISSIONS EMPLOY 4 SHIP TACTICS

C. ALL OTHER FLIGHTS ARE 2 SHIP

D. A DESIRED BASIC MIX OF CAP TO WW TO STRIKERS IS ENTERED INTO THE PROGRAM INSTRUCTIONS.

E. SET SIZE EXPANDS ON A RATIO OF UCACAP TO UCASTK OR INTSTK FLIGHTS.

F. A DESIRED LEVEL OF OASCAS IS SUBTRACTED AND ASSIGNED DUTY AS CASFTR GROUND ALERT. HERE THE FRAGGER INPUTS DESIRED LEVELS OF ALERT FORCES AS DICTATED BY AIR BATTLE STRATEGY. AS REQUESTED ARMY PREPLANNED CAS ARRIVES, SORTIES CAN BE ASSIGNED TO FILL THEM FROM OASCAS IN STRIKE SETS OR FROM CASFTR SET-ASIDES. (SEE NOTE 7) FOR EXAMPLE, 50% OF MISSIONS ASSIGNED OASCAS MAY BE EARMARKED FOR CASFTR ALERT. CARRYING THIS RATIONALE FURTHER, IF HEAVY GROUND FIGHTING IS EXPECTED 80-90% OF OASCAS COULD BE ASSIGNED TO CASFTR WITH A CORRESPONDING DROP IN STRIKE SET ASSIGNED OASCAS. IF LIGHT GROUND ACTION IS EXPECTED, MORE OASCAS CAN BE ASSIGNED TO STRIKE SETS. THESE MISSIONS WILL HAVE SECONDARY BAI MISSIONS. THUS, THE WASTE OF UNUSED CASFTR ALERT AIRCRAFT CAN BE MINIMIZED.

G. TIME OF DAY VARIABLE, E.G. HEAVY AT DAWN AND DUSK, LIGHTER AT OTHER TIMES, LIGHTEST DURING HOURS OF DARKNESS. WEATHER PATTERNS MAY ALSO BE A FACTOR HERE.

H. STRIKE SET WINDOW PARAMETERS: STRIKE SET TACTICIANS AND PLAYERS WOULD REACH AGREEMENT ON WHAT TIME FRAME AND GEOGRAPHIC AREA OF COVERAGE SHOULD BE PLANNED FOR A STRIKE SET OF PARTICULAR SIZE AND COMPOSITION. ALL STRIKE AIRCRAFT WOULD THEN OPERATE UNDER THE EFFECTIVE CAP/AW UMBRELLA. SUFFICIENT TIME WILL BE ALLOWED FOR STRIKERS TO GET IN AND GET OUT WITHOUT CONFLICTING WITH EACH OTHER, BUT WITHIN THE SHORTEST ALLOWABLE TIME FRAME TO PRESERVE MASS AND IMPROVE MUTUAL SUPPORT AND SURVIVABILITY. OCACAP AND AW PLANNERS CONSIDER HOW LARGE A CHUNK OF SKY THEY CAN REASONABLY ACHIEVE TEMPORARY AIR SUPERIORITY OVER AND INFLUENCE STRIKE SET SIZE, COMPOSITION AND TARGETING.

I. RANDOM TIME GENERATOR TO RANDOMLY VARY SPACING OF STRIKE SETS. THIS AVOIDS THE "REGULAR AS CLOCKWORK" SYNDROME WHICH ALLOWS ENEMY GUNNERS TO TAKE "REGULAR AS CLOCKWORK" MAPS.

J. OTHER PARAMETERS CAN BE DEVELOPED AND IMPLEMENTED AS EXPERIENCE WITH THE PROGRAM INCREASES.

3.2.3 INDIVIDUAL STRIKE SET EDIT FEATURE:

FIGURE 4 PRESENTED A GRAPHIC DEPICTION OF THE ENTIRE DAY'S STRIKE SETS. THE INDIVIDUAL STRIKE SET EDIT FEATURE ALLOWS US TO ZERO IN ON ANY ONE STRIKE SET TO CRITICALLY EXAMINE THE COMPUTED COMPOSITION. IT COULD LOOK LIKE THIS:

STRIKE SET TIME FOR 0600

TOTAL SORTIES GENERATED = 100

INDEX	MSN	MIN REQUIRED	GEN SORTY
1	OCACAP	30	30
2	OCASTK	15	15
3	OASBAI	30	30
4	INTSTK	15	15
5	OASCAS	6	6
6	A/A	4	4

RESOURCES REMAINING

MSN	TOTAL A/C	SORTIES REMAINING
A/A	25	81
A/G	27	117
W/W	10	20

FIGURE 5

3.2.4 THE ABC/DCO AND THE TACTICAL EXPLOITATION TEAM CONSIDER AND ADJUST AS NECESSARY THE COMPOSITION OF EACH STRIKE SET. AT THIS TIME, OBJECTIVES FOR EACH SET ARE ARTICULATED. THE FORCE COMPOSITION OF THE SET IS TAILORED TO THOSE OBJECTIVES BY ADDING/SUBTRACTING TYPES OF MISSIONS, ADJUSTING SET TIME AND GIVING TARGETING GUIDELINES. AS EACH SET IS COMPLETED, THE COMPUTER IS INSTRUCTED TO FIX THE SET NUMBERS FROM FURTHER ADJUSTMENT. THE PROGRAM THEN RE-FLOWS THE REMAINING UNTASKED FORCES OVER THE REMAINING UNFIXED SETS. ONCE ALL SETS HAVE BEEN FIXED, THE COMPUTER TABULATES THE ACTUAL APPORTIONMENT/ALLOCATION. THE DIFFERENCES FROM THE GOING-IN POSITION SHOULD BE EVIDENT FROM THE PRECEEDING DISCUSSION. IF THE REQUIRED APPORTIONMENT/ALLOCATION IS UNACCEPTABLE THE STEP 2 TASK CAN BE REACCOMPLISHED, SHIFTING MISSION ASSIGNMENTS WITHIN CERTAIN SETS TO CHANGE SORTIES FROM ONE APPORTIONMENT CATEGORY TO ANOTHER. WHEN AGREEMENT ON APPORTIONMENT IS REACHED, STEPS 3 AND 4 CAN START SIMULTANEOUSLY.

3.3 STEP 3, APPORTIONMENT AND ALLOCATION.

THE CHIEF, COMBAT PLANS DIVISION EMERGES FROM THE STRATEGY PROJECTION MEETING WITH THE COMPLETE SET OF APPORTIONMENT AND ALLOCATION NUMBERS REQUIRED TO ACHIEVE THE DETAILED STRATEGY WORKED OUT AT THE MEETING. HE THEN FORMS THE APPORTIONMENT/ALLOCATION BRIEFING FOR PRESENTATION TO THE AIR COMPONENT COMMANDER (IF HE WASN'T AT THE MEETING) AND THE CINC. THIS BRIEFING IS FORWARDED VIA WHATEVER CHANNELS ARE REQUIRED, IDEALLY VIA DATA LINK TO THE CINC/CACC COMMAND POST COMPUTERS. GIVEN THE COMPUTER LINK, WELL DEVELOPED STRATEGY AND DEMONSTRABLE OBJECTIVES, APPROVAL WILL BE OBTAINED IN A FRACTION OF THE CURRENT TIME REQUIRED.

3.4 STEP 4, THE STRIKE GENERATION PROPOSAL (SGP)

WHILE THE APPORTIONMENT BRIEFING GOES FORWARD FOR APPROVAL, THE FRAG CONTINUES TO BE GENERATED. THE NEXT STEP IS APPLICATION OF AIRCRAFT, TARGETS AND SUITABLE WEAPONS LOADS.

3.4.1 TO START THE PROCESS, THE COMPUTER EXECUTES A PROGRAM WHICH SEARCHES THE FIGHTER WING RECORD FILES AND SELECTS SUITABLE AIRCRAFT BY WING CALLSIGNS (NOT TAIL NUMBERS) AND FLOWS THE AVAILABLE FORCES OF ALL WINGS ACROSS THE NEXT DAY'S STRIKE GENERATION MATRIX. THE RESULT IS A FRAG SHELL WHICH HAS THE MISSION LINE COMPLETED AND THE REMAINING LINES IN BLANK FORMAT READY FOR FRAGGER, TARGETEER, WEAPONEER INPUT. FIGURE 6 IS AN EXAMPLE OF THIS COMPUTER GENERATED FRAG SHELL.

FIGURE 6

3.4.2 THE DISPLAY IS CALLED UP BY THE TACTICAL EXPLOITATION TARGETING CELL. BASED ON DISCUSSIONS WITH THE COMMANDER DURING FORMATION OF THE STRIKE GENERATION MATRIX, THIS CELL COMPOSED OF A PLANNER (FIGHTER WEAPONS EMPLOYMENT EXPERTISE), A TARGETEER (INTELLIGENCE INFORMATION) WITH THEIR COMBINED (OR ADDITIONAL, AS REQUIRED) WEAPONEERING SKILLS APPLIES TARGETS AND WEAPONS LOADS TO THE FRAG. HERE THE PREVIOUSLY DETERMINED STRATEGY FOR TOMORROWS STRIKES IS EXECUTED. CONSIDERED ARE: WEAPONS EMPLOYMENT TACTICS, OVERALL BATTLE STRATEGY, INTELLIGENCE EXPLOITATION AND WEATHER PROBABILITIES.

A. THE TACTICAL EXPLOITATION TARGETING CELL CALLS UP EACH MISSION BY SET GROUPS AND ENTERS PRIMARY, SECONDARY TARGETS AND WEAPONS LOADS. THE TARGETING CELL HAS AVAILABLE, DISPLAYS OF TARGET LISTS, GROUND OR AIR SITUATION, AIR ORDER OF BATTLE AND THE LIKE.

B. ALTERNATIVELY, A SEPARATE WEAPONEERING CELL COULD WORK WITH THE TACTICAL EXPLOITATION TARGETING CELL ON ANOTHER CONSOLE, APPLYING APPROPRIATE SCL NUMBERS. THE WEAPONEERING CELL HAS DISPLAYS OF WOC OR RMC DATA TO ASSURE SUFFICIENT STOCKS OF THE DESIRED WEAPONS ARE AVAILABLE.

3.4.3 IF AT ANY TIME THE ABC OR DCO DETERMINES THE OBJECTIVE FOR ONE OR MORE OF TOMORROW'S STRIKE SETS MUST BE CHANGED, IT IS A SIMPLE MATTER TO CONTACT THE TARGETING CELL, JOINTLY REVIEW THE STRIKE GENERATION MATRIX AND GIVE THE NEW OBJECTIVE DIRECTION. THE REQUIRED SET IS THEN RECALLED AND RETARGETED.

3.4.4 THE COMBAT PLANS FRAGGER THEN REVIEWS THE STRIKE SET AND ENTERS TOT AND ROUTING INSTRUCTIONS TO ASSURE DECONFLICTION. CONTROL FREQUENCES AND REMARKS ARE ADDED AS REQUIRED.

3.5 STEP 5, AUTHORIZATION

THE COMPLETED MISSIONS ARE COLLATED BY THE COMPUTER AND PRESENTED BY STRIKE SET GROUPS. THE FRAGGER, TARGETEERS, WEAPONEERS AND, IF DESIRED, THE AIR BATTLE COMMANDER CONFER AS EACH WATCHES HIS VIDEO PRESENTATION, CHECKING THE FRAG FOR ACCURACY AND COMPLIANCE WITH DIRECTION. FINALLY, A COMPUTER TABULATION IS PERFORMED IN WHATEVER FORMAT IS DESIRED BY THE COMMANDER. AN SOP REVIEW IS PRESENTED ALONG WITH A DECISION BRIEFING TO THE COMMANDER. UPON HIS APPROVAL, STEP 5 IS INITIATED.

3.6 STEP 6, DISSEMINATION

THIS STEP IS ACCOMODATED IN THE CURRENT CONSTANT WATCH AND CAFMS CONCEPTS. EACH OPERATIONAL UNIT RECEIVES THE FRAG AND PREPARES FOR ITS EXECUTION. IT IS CONCEIVABLE THAT THE TIME IMPROVEMENTS ALLOWED BY THE COMPUTER ASSISTED SYSTEM COULD PERMIT INCREMENTAL RELEASE OF FRAG ORDERS TO ALLOW THE OPERATIONAL WINGS MORE LEAD TIME TO PREPARE AIRCRAFT FOR ASSIGNED MISSIONS. THIS WOULD ALSO INCREASE THE COMMANDER'S FLEXIBILITY TO ADAPT LATER PORTIONS OF THE FRAG TO CHANGING BATTLE REQUIREMENTS.

4.0 ADVANTAGES

THE CAPABILITY REPRESENTED BY SOFTWARE APPLICATIONS DEPICTED HERE OFFERS SOME VALUABLE, EVEN REVOLUTIONARY IMPROVEMENTS TO THE SYSTEM. THE MOST OBVIOUS ARE:

4.1 RESPONSIVENESS:

4.1.1 SHORTENING THE DECISION-TO-EXECUTION CYCLE FOR THE COMMANDER.

CURRENTLY, THE COMMANDER MUST DECIDE HIS APPORTIONMENT OF FORCES SOME 30 HOURS BEFORE IT WILL BE IN EFFECT. HE DECIDES HOW TO APPORTION HIS FORCES FOR THE DAY AFTER TOMMORROW, DECIDING ON THE BASIS OF YESTERDAY'S RESULTS. THIS FOUR DAY SPAN IS TOO LONG A DECISION TIME SPAN TO ACCOMMODATE THE MODERN HIGH TECHNOLOGY BATTLE-FIELD. APPLICATION OF COMPUTER POWER OFFERS HOPE OF GETTING AHEAD OF THE ENEMY'S STRATEGY THROUGH EFFICIENT IMPLEMENTATION OF RAPID COUNTER STRATEGY. DEVELOPMENT OF THIS COMPUTER ASSISTED FRAG GENERATION CAPABILITY AS AN ENHANCEMENT OF THE CAFMS AND CONSTANT WATCH PROMISES TO CUT FRAG CYCLE TIME BY TWO-THIRDS GIVING COMMANDERS THE CAPABILITY TO RAPIDLY CHANGE ENTIRE AIR CAMPAIGN STRATEGY IN A MATTER OF HOURS, VIA THE ATO.

4.1.2 RAPID REACTION TO CHANGES IN STRATEGY AND EXPLOITATION OF CURRENT INTELLIGENCE.

COMPUTER ASSISTED FRAG GENERATION CAN BE STOPPED IN MID CYCLE AND RAPIDLY RERACKED TO FIT LATE BREAKING EXPLOITATION OPPORTUNITIES. STEPS 1 THRU 4 CAN BE TOTALLY REDONE IN MINUTES TO PRODUCE A FRAG WHICH EXECUTES ANY STRATEGY DESIRED. THIS IS POSSIBLE BECAUSE THE COMPUTER MAINTAINS THE FORCE STATUS AS A RUNNING TALLY DURING FORCE PLANNING MANIPULATIONS TO ACCOMPLISH WHAT-

EVER TASK IS DESIRED. AUTOMATIC FLAGS DRAW ATTENTION TO FORCE GENERATION LIMITS, PERMITTING IMMEDIATE RESTRATEGIZING. THE CURRENT HAND CRANKED SYSTEM IS INCAPABLE OF THIS RESPONSIVENESS. COMPUTER SPEED WILL PERMIT INCREMENTAL RELEASE OF FRAG ORDERS WITH BENEFITS AS STATED IN 3.5 ABOVE.

4.2 VISIBILITY

COMPUTER ASSISTANCE PERMITS ELECTRONIC PRESENTATION TO THE COMMANDER AT APPROPRIATE TIMES, OR AS REQUESTED, TO RULE ON DIFFERENCES OF OPINION OR RESTATE OBJECTIVES. THIS IS A QUANTUM ADVANCE IN VISIBILITY OVER THE CURRENT SINGLE COPY HAND WRITTEN FRAG WHICH THE COMMANDER MAY NEVER SEE BEFORE IT IS PUBLISHED. MORE IMPORTANTLY, IT ALLOWS EFFECTIVE REVIEW AND DECISION MAKING ON STRATEGY AND EMPLOYMENT OF FORCES BY THE COMMANDER.

4.3 ACCURACY

BY JUDICIOUS SELECTION OF PARAMETERS, THE COMPUTER CAN DO AUTOMATIC CHECKING THROUGHOUT THE FRAG GENERATION CYCLE, TO WARN THE FRAGGER OF APPROACHING LIMITATIONS AND OVEREXTENSION OF RESOURCES IT OFFERS CAPABILITY FOR ACCOMPLISHMENT OF LAST MINUTE CHANGES WITH A LEVEL OF SAFETY NOT POSSIBLE IN THE PRESENT MANUAL SYSTEM.

4.4 FORCE APPORTIONMENT/ALLOCATION.

THE SPEED OF THE COMPUTER PERMITS DELAY OF THE APPORTIONMENT/ALLOCATION DECISIONS UNTIL APPROXIMATELY NOON OF THE DAY BEFORE, RATHER THAN THE 30 HOUR LEAD TIME NOW REQUIRED. IN ADDITION, FORMATION OF THE STRIKE GENERATION MATRIX IN THE MORNING STRATEGY CONFERENCE PRODUCES A FULLY SUPPORTED SET OF APPORTIONMENT/ALLOCATION NUMBERS, A REVOLUTIONARY IMPROVEMENT OVER THE ESTIMATION PROCESS NOW IN EFFECT.

5.0 CLOSING STATEMENT

WHILE ALL NUMBERS USED IN THIS PAPER WERE FICTIONAL, THEY ARE REPRESENTATIVE OF THE REAL WORLD, WITH THE KINDS OF PROBLEMS AND CONSIDERATIONS WHICH CAN BEST BE HANDLED BY THIS PROPOSED ENHANCEMENT OF THE CAFMS AND CONSTANT WATCH PROGRAMS. WHATEVER THE RESULT OF THIS PAPER, AND ANY SIMILAR EFFORTS, THERE EXISTS A CRITICAL NEED FOR A SYSTEM OF FRAG GENERATION WHICH PERMITS THE SIMULTANEOUS PRODUCTION OF A COMPLEX BUT WELL ORCHESTRATED FRAG BASED ON THE COMMANDERS GUIDANCE AND OBJECTIVES. THE CONCEPT HERE PRESENTED INCLUDES THAT CAPABILITY. OUR FIRST EFFORTS AT DEMONSTRATING THIS FRAG GENERATION CAPABILITY WITH SOFTWARE WRITTEN BY MAJOR PETE CROSSMAN, MY COMPATRIOT AND FRIEND IN 608 TACC COMBAT COMBAT PLANS, HAS ALREADY SHOWN THE REVOLUTIONARY POSSIBILITIES FOR CHANGING THE WAY WE RECOMMEND APPORTIONMENT. I HAVE INCLUDED SOME OF OUR PRELIMINARY WORK AS APPENDIX A.

ALTHOUGH THIS PAPER IS NOT COMPREHENSIVE IN ITS ADDRESS OF THE WIDE SPECTRUM OF FRAGS GENERATED IN THE PROSECUTION OF WAR, IT STRIKES AT THE MAJOR DEFICIENCIES IN THE CURRENT SYSTEM. GIVEN THE COMPUTER ASSISTED FRAG GENERATION CAPABILITY DESCRIBED, ALL OTHER FORSEEABLE PROBLEMS ARE SOLVABLE. MY DESIRE IS THAT I HAVE PLANTED A SEED AND STARTED THE CREATIVE PROCESS NECESSARY TO DEVELOPMENT AND INCORPORATION OF COMPUTER ASSISTED FRAG GENERATION CAPABILITY INTO MANAGEMENT OF TACTICAL AIR FORCES.

AUTHORS NOTES

NOTE 1: THE AIR TASKING ORDER (ATO) ORIGINATED AS A BREAKOUT OF THE OVERALL OPERATIONS ORDER, GIVING SPECIFIC INSTRUCTIONS TO INDIVIDUAL AIRCRAFT OR MULTI-AIRCRAFT FORMATIONS. HENCE THE NICKNAME "FRAGMENTARY ORDER" SHORTENED SIMPLY TO "FRAG ORDER" OR "THE FRAG" BY BUSY AIRCREWS. I WAS ONE OF THOSE CREWS AND OLD HABITS DIE HARD. IN THIS PAPER I USE THE TERM "FRAG" FOR ATO. IT STILL SOUNDS BETTER. OF COURSE, ONE WHO CREATES A FRAG IS A "FRAGGER".

NOTE 2: THE AIR WAR IS CONDUCTED BOTH DEFENSIVELY AGAINST THE ENEMY GROUND AND AIR OFFENSIVE; AND OFFENSIVELY, BOTH TO DISRUPT HIS SECOND AND THIRD ECHELON FORCES AND TO INTERDICT HIS CAPACITY TO WAGE WAR IN THE LONG TERM. MISSION CATEGORIES TO ACCOMPLISH THESE TASKS ARE:

(1) DEFENSIVE FORCES

- DEFENSIVE COUNTER AIR ALERT STRIP INTERCEPTORS (DCAINT)
- CLOSE AIR SUPPORT ALERT STRIP FIGHTERS (CASFTR)

(2) OFFENSIVE FORCES

- OFFENSIVE COUNTER AIR (OCA)
  - COMBAT AIR PATROL (OCACAP)
  - COUNTER AIR STRIKE (OCASTK)
  - WILD WEASEL (OCAWW)
- OFFENSIVE AIR SUPPORT (OAS)
  - BATTLEFIELD AIR INTERDICTION (OASBAI)
  - CLOSE AIR SUPPORT FIGHTERS (OASCAS)
- INTERDICTION STRIKE (INT)

NOTE 3: THE TACTICAL EXPLOITATION TEAM CONCEPT IS SUGGESTED BY COLONEL CHUCK LINK, 314 AIR DIVISION, DEPUTY FOR COMBAT OPERATIONS, AS THE LOGICAL MEANS TO CAPITALIZE ON THE ADVANCES IN BOTH FRAG CYCLE AND IMPROVED REAL TIME INTELLIGENCE TECHNOLOGY BY BRINGING THE FULL WEIGHT OF COMBAT PLANNING EXPERTISE AVAILABLE IN THE TACC TO BEAR ON TOMORROW'S BATTLE PLAN. THIS GROUP, COMPOSED OF ACTION OFFICERS FROM COMBAT OPERATIONS, COMBAT PLANS, COMBAT INTELLIGENCE, AND SUPPORTING UNITS AS REQUIRED, IS THE AIR BATTLE COMMANDER'S MEANS FOR (1) INJECTING COMMANDER'S STRATEGY AND OBJECTIVES INTO WAR PLANNING AND CONDUCT, (2) REACTING IN REAL TIME TO INFORMATION AND OPPORTUNITIES BY WHICH OUR FORCES CAN EXPLOIT ENEMY WEAKNESS OR FRIENDLY FORCES SUCCESSES. THE GROUP MEETS ON DEMAND AND RAPIDLY ACCOMPLISHES TASKS DEALING WITH PERISHABLE OPPORTUNITIES FOR EXPLOITATION. IN ADDITION, SCHEDULED MEETINGS PROVIDE A FORUM FOR DISCUSSION OF STRATEGY, ARTICULATING THE COMMANDER'S GUIDANCE AND OBJECTIVES AND FORMING THE STRIKE GENERATION MATRIX.

NOTE 4: STEP 1 AND STEP 2 ARE CLOSELY INTERRELATED. THE AIR BATTLE COMMANDER MAY WELL USE STEP 2 STRIKE GENERATION MATRIX TO FORM JUDGEMENTS AND RATIONALE FOR BATTLE STRATEGY AND EXPERIMENTATION WITH APPORTIONMENT/ALLOCATION NUMBERS. THE SGM FORMATION EXERCISE PROVIDES VALUABLE INSIGHT INTO STRATEGY EFFECTS ON FORCE MANAGEMENT. AN INITIAL CUT AT PROGRAM SOFTWARE HAS DEMONSTRATED THE VALUE OF THIS STRIKE GENERATION MATRIX EXERCISE IN FORMING APPORTIONMENT/ALLOCATION RECOMMENDATIONS.

NOTE 5: OFFENSIVE COUNTER AIR IS COMPOSED OF BOTH AIR TO AIR (OCACAP) AND AIR TO GROUND (OCASTK, OCAww) SORTIES. FURTHER BREAKOUT PROGRAM INSTRUCTIONS FOR SORTIES IN THESE CATEGORIES ARE PROVIDED TO THE COMPUTER BY AGREEMENT AMONG WEAPONS EMPLOYMENT EXPERTS TO ACHIEVE A PROPER RATIO GIVEN THE ENEMY THREAT.

NOTE 68 SMOOTHFLOW VERSUS GORILLA STRIKES IS AN ISSUE WHICH HAS BEDEVILED AIR WAR PLANNERS AND OPERATORS OVER THE COURSE OF HISTORY. EACH METHOD, IN ITS ULTIMATE FORM, HAS OBJECTIVES AT OPPOSITE ENDS OF THE SPECTRUM OF TACTICAL STRATEGY. SIMPLISTICALLY STATED, SMOOTHFLOW PROVIDES THE MAXIMUM SORTIE RATES AND TONNAGE OF BOMBS WITH MINIMUM FORCES. IT PRODUCES MAXIMUM EFFICIENCY OF EFFORT, EQUIPMENT,FACILITIES AND MANPOWER. ON THE OTHER HAND, SMOOTHFLOW REDUCES THE NUMBER OF FORCES IN THE AIR AT ANY GIVEN TIME. THE GORILLA STRIKE STRATEGY GATHERS LARGE PROPORTIONS OF THE AVAILABLE FORCES INTO THE AIR AT ONE TIME. THIS PROMOTES MASS FIREPOWER CONCENTRATION BUT SEVERELY DEGRADES THE EFFICIENCY OF THE GROUND SUPPORT OPERATION WHICH HAS TO DEAL WITH LARGE CUMBERSOME BATCHES OF AIRCRAFT, STOKING UP RESOURCES TO BUILD THE GORILLA AND GETTING LEFT WITH A LARGE BATCH OF EXPENDED AND BROKEN AIRPLANES WHEN THE GORILLA RETURNS TO BASE. AT ITS BEST, THE GORILLA STRIKE KILLS A DIFFICULT TARGET AND DISPLAYS OUR COUNTRY'S AWESOME AIR WEAPON AT ITS TOUGHEST. IN CONTRAST TO SMOOTHFLOW, FEWER TARGETS HAVE BEEN HIT, FEWER SORTIES FLOWN, LESS ORDNANCE DELIVERED AND LESS TOTAL PRESSURE PUT ON THE ENEMY'S AIR AND GROUND FORCES. THERE IS AN OPTIMUM POINT, BETWEEN A SINGLE HERCULEAN GORILLA STRIKE AND A ONE SORTIE PER MINUTE ULTIMATE SMOOTHFLOW, WHICH BEST SUITS EACH BATTLE STRATEGY. THE KEY IS KEEPING TRACK OF THE STATUS OF AIR ASSETS - BEANCOUNTING, IF YOU WILL - WHICH THE COMPUTER DOES QUITE WELL. HUMAN/COMPUTER FORMATION OF THE STRIKE GENERATION MATRIX HAS AS ITS OBJECTIVE, THE IDENTIFICATION OF THAT OPTIMUM POINT TO FIT THE DESIRED STRATEGY AND OBJECTIVES.

NOTE 7: THE STRIKE SETS OFFER A MEANS TO BETTER USE THE DAS CASFTR GROUND ALERT ASSETS WHEN THE GROUND BATTLE DOES NOT DEMAND CAS AT AS GREAT A RATE AS ESTIMATED. CASFTR SORTIES CAN BE ASSIGNED PREPLANNED DASCAS ORBITS AND TOTS COINCIDING WITH STRIKE SETS. IF NOT USED FOR CAS THE FIGHTERS CAN JOIN THE STRIKE SET, GOING TO AN ASSIGNED ALTERNATE BAI TARGET AREA. A SUFFICIENT CASFTR FORCE IS MAINTAINED FOR IMMEDIATE CAS REQUESTS WHILE OTHERWISE IDLE ASSETS ARE MADE AVAILABLE IN A STEADY FLOW TO THE MAIN BATTLE AREA WITH ALTERNATE BAI MISSIONS IF NOT USED FOR CAS. A COMPUTER AIDED FORCE MANAGEMENT SYSTEM WILL PROVIDE CAPABILITY TO FRAG THESE MISSIONS ON A REAL TIME BASIS.

INTRODUCTION TO ANNEX A

IN JULY 1981 A PROTOTYPE OF A FRAG GENERATION SYSTEM WAS BUILT BY MAJOR PETE CROSSMAN, 314AD/COMBAT PLANS, USING THE 'BASIC' LANGUAGE ON THE HONEYWELL H6000 COMPUTER SYSTEM. THIS PROGRAM ALLOWED THE TESTING OF IDEAS AND ALGORYTHMS FOR PRACTICALITY AND WORKABILITY. THE PROTOTYPE WAS EXTREMELY SUCCESSFUL. IT PROVIDED AN INSIGHT INTO WHAT WAS, AND WAS NOT NEEDED FOR AN AUTOMATED FRAG GENERATION SYSTEM. THE SAMPLES WHICH FOLLOW WERE GENERATED USING THAT PROTOTYPE. IT IS HOPED THAT THE TIME AND EFFORT EXPENDED ON THIS PROJECT WILL EVENTUALLY LEAD TO A MORE SOPHISTICATED PROGRAMMING EFFORT WHICH WILL ULTIMATELY AUTOMATE THE 'FRONT END' OF THE PRESENT FRAG-II FRAGGING SYSTEM IN KOREA. WHAT FOLLOWS IS A DEMONSTRATION OF THE CAPABILITIES OF THIS FRAGEN SYSTEM.

FIGURE A-4.2 INITIAL STRIKE GENERATION MATRIX

THE PROGRAM HAS DISTRIBUTED THE AVAILABLE FORCES ACROSS 14 STRIKE SETS IN ATTEMPTING TO FLOW MAXIMUM STRIKE SETS, IT HAS RUN SHORT OF ASSETS LATE IN THE DAY. WARNING FLAGS (ASTERISKS) DRAW ATTENTION TO THIS FACT. THE NEXT STEP IS TO EXAMINE THESE LAST TWO STRIKE SETS.

STRIKE SET 22 FOR TIME 2200 TOTAL SORTIES GENERATED = 14

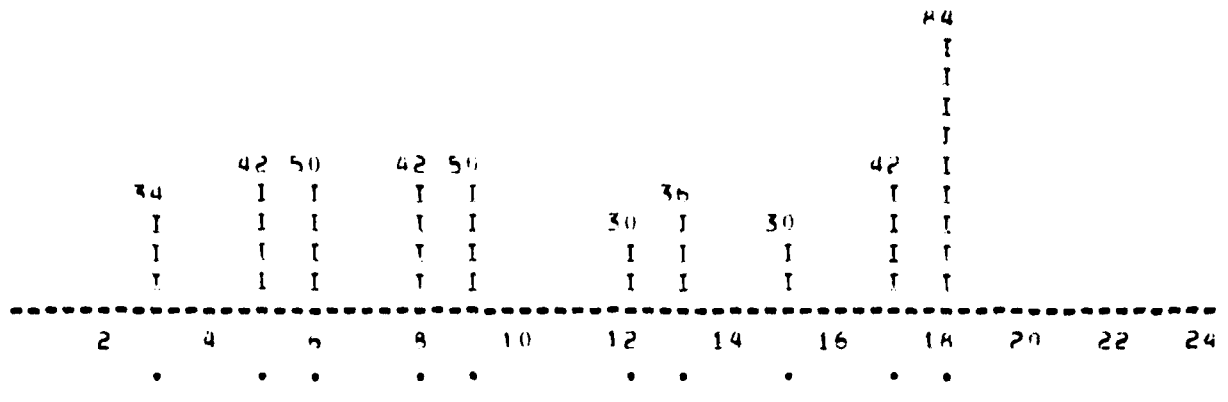
FIGURE A-4.4 INDIVIDUAL STRIKE SET DISPLAY (STRIKE SET #24)

THIS STRIKE SET RAN OUT OF A/G SORTIES. THIS IS THE LAST STRIKE SET OF THE DAY. IN THIS INITIAL SGM, SINCE WE WILL BE EXAMINING EACH STRIKE SET IN DETAIL, IT IS ONLY IMPORTANT TO NOTE AT THIS POINT HOW MANY SORTIES REMAIN UNTASKED BY THE AUTOMATIC PROGRAM. 22 SORTIES A/A AND 4 SORTIES A/A ARE AVAILABLE FOR ADDITION TO THE SGM DURING THE FOLLOWING SGM FINE TUNING EXERCISE. WE ARE ALSO WARNED THAT A/G SORTIES ARE OUR CRITICAL RESOURCE. THERE IS NO NEED TO CLEAR WARNING FLAGS AT THIS PRELIMINARY STAGE.

STRIKE GENERATION MATRIX



MAXIMUM SORTIES AVAILABLE = 456 TOTAL SORTIES GENERATED = 440 /

FIGURE A-5.1 FINAL STRIKE GENERATION MATRIX

STARTING WITH THE INITIAL SMOOTHFLOW SGM (FIGURE A-4.2) AND THE CRITICAL RESOURCES INFORMATION FROM EXAMINATION OF THE LAST STRIKE SETS (FIGURES 4.3,4.4), THE TACTICAL EXPLOITION TEAM CRITICALLY EXAMINES EACH STRIKE SET, ONE BY ONE, TO FORM THEM FOR APPLICATION TO SPECIFIC OBJECTIVES. THIS FINAL MATRIX IS CONSIDERABLY DIFFERENT FROM THE GOING-IN SGM IN FIGURE A-4.2. THE RATIONALE FOR THE DIFFERENCE HAS BEEN RECORDED DURING THE STRATEGY PROJECTION DISCUSSIONS BY THE CHIEF, COMBAT PLANS DIVISION AND BECOMES BACKGROUND INFORMATION FOR HIS PREPARATION OF THE APPORTIONMENT/ ALLOCATION BRIEFINGS. TO GET FROM INITIAL TO FINAL SGM THE TACTICAL EXPLOITATION TEAM APPLIED OBJECTIVES TO THE STRIKE SETS AND TAILORED EACH SETS ASSETS TO DO THE JOB. SPECIFIC ACTIONS ARE DEMONSTRATED IN FIGURES A-5.2 THRU A-5.7.

THE TEAM SELECTS THE FIRST PRIORITY OBJECTIVE FOR TOMORROWS WAR AND TAILORS THE NEAREST STRIKE SET TO ACCOMPLISH THAT OBJECTIVE. HERE, ASSUME INTELLIGENCE INFORMATION INDICATES MAJOR GROUND ATTACKS AT TWO POINTS ALONG THE BATTLE AREA. OUR AIR BATTLE STRATEGY IS TO STRIKE AT CAPN TO DISRUPT SECOND AND THIRD ECHELON FORCES. THE FIRST FOUR DAYLIGHT STRIKES ARE MOVED TO 0530, 0600, 0800, 0850 AND ALTERNATED BETWEEN THE TWO EXPECTED ATTACK AREAS. THE COMPOSITION OF THIS 0530 STRIKE IS SHOWN BEFORE (FIGURE A-5.2.1) AND AFTER (FIGURE A-5.2.2) 10 INTSTK SORTIES HAVE BEEN REDESIGNATED TO THE OASBAI MISSION, THIS ALIGNS THE FORCES TO ATTACK 2ND AND 3RD ECHELON TARGETS. NOTE THE COMPUTER CALCULATES RESOURCES REMAINING AS THE PROGRAM AUTOMATICALLY REFLOWS FORCES ACROSS THE REMAINING SETS. THIS RESTRUCTURING IS REPEATED FOR THE FOUR EARLY LIGHT STRIKE SETS TO ACCOMPLISH OBJECTIVES. THE COMPUTER IS THEN INSTRUCTED TO EXEMPT THESE SETS FROM FURTHER CHANGE, AND WE MOVE TO OUR NEXT BATTLE OBJECTIVE.

STRIKE SET 5 FOR TIME 0500 TOTAL SORTIES GENERATED = 42

FIGURE A-5.2.2 STRIKE SET #5 (AFTER)

OPERATIONS AND INTELLIGENCE PLANNERS HAVE BEEN ALERTED TO A LUCRATIVE TARGET ARRAY DEEP IN ENEMY TERRITORY. CURRENT INTELLIGENCE INDICATES THAT TOMORROW EVENING IS THE OPTIMUM TIME TO STRIKE. SET #18 IS DESIGNATED TO ACCOMPLISH THIS OBJECTIVE.

THE DASBAI MISSION IS INAPPROPRIATE TO THE DEEP INTERDICTION OBJECTIVE. THEREFORE THE 12 DASBAI SORTIES ARE REDESIGNATED AS INTSTK. THE TARGETS AREA IS A KNOWN HEAVY DEFENDED AREA. THEREFORE THE DCACAP, DCASTK AND A/W ASSETS ARE BEEFED UP TO COUNTER THE ENEMY AIR ORDER OF BATTLE. NOTE THE RESOURCES REMAINING TABLE INDICATES WE HAVE TASKED OUR A/A ASSETS TO THE MAXIMUM AT THIS POINT. 15 AIRCRAFT ARE REGENERATED FROM PREVIOUS SORTIES BUT THE UNIT TASKED SORTIE RATE HAS BEEN MET. THIS FACT CAUSES THE GROUP TO CONSIDER THE FACT THAT NO MORE DCACAP IS AVAILABLE FOR SUBSEQUENT SETS WITHOUT REALLOCATING DCA SORTIES TO DCA, OR REASSIGNING OTHER REMAINING ASSETS TO THE DCACAP MISSION. FOR THIS DAY, THE DCC HAS ACCEPTED THE MAXIMUM EXTENSION OF EXISTING DCACAP ASSETS AND CANCELS THE LAST TWO PROGRAMMED STRIKE SETS.

STRIKE SET 18 FOR TIME 1800 TOTAL SORTIES GENERATED = 54

FIGURE A-5.4 STRIKE SET #3 (AFTER)

AS DISCUSSION TERMINATES ON STRIKE SET #18, AN OPERATIONS ALERT WARNING FLASHES ON THE CONFERENCE ROOM DISPLAY. THE SENIOR DUTY OFFICER (SODO) APPEARS VIA CCTV AND BRIEFS THAT B-52S HAVE BEEN RELEASED TO SUPPORT THE AIR BATTLE, THEY CAN BE OVER THE BATTLE AREA AT 0330 TOMORROW. THE DCO ACCEPTS THE TOT, INSTRUCTING THE SODO TO REPLY IN THE AFFIRMATIVE AND INSTRUCTS THAT OUR ESCORT PACKAGE WILL BE READY AND IN THE FRAG THIS AFTERNOON ALONG WITH A SUITABLE TARGET. DISCUSSION TURNS TO TARGETING OBJECTIVES AND BUILDING A SUITABLE ESCORT PACKAGE. STRIKE SETS 0100 AND 0300 ARE COMBINED INTO STRIKE SET #3 AND AUGMENTED AS DESIRED TO FORM AN APPROPRIATE PACKAGE FOR SUPPRESSION OF AIR DEFENSES TO CREATE A PERMISSIVE ENVIRONMENT FOR THE B-52 ATTACK ON ENEMY TROOPS AND ARMOR CONCENTRATIONS.

THE COMPUTER REFLOWS FORCES OVER NON FIXED STRIKE SETS. A QUICK REVIEW OF THESE REMAINING STRIKE SETS FINALIZES THE SGM (FIGURE A-5.1).

APPORTIONMENT/ALLOCATION FIGURES

MAXIMUM SORTIES AVAILABLE = 700

MISSION	TARGET = 680 %	TARGET = 680 SORTIES	GENERATED = 684 %	GENERATED = 684 SORTIES
OAS	20 %	136	22 %	150
OASCAS	30 %	40	27 %	40
OASBAI	70 %	96	73 %	110
C/A	60 %	408	61 %	416
OCA	50 %	204	49 %	204

W/W	29 %	59	23 %	48
INT	20 %	136	17 %	118
INTSTK	100 %	136	100 %	118

TOTAL AIRCRAFT AVAILABLE: A/A = 122 A/G = 124 W/W = 24
TOTAL SORTIES AVAILABLE: A/A = 512 A/G = 328 W/W = 60

FIGURE A-6

THE COMPUTER THEN PRESENTS THE APPORTIONMENT AND ALLOCATION FIGURES BOTH INITIAL ESTIMATES (TARGET) AND ACTUAL FROM THE FINISHED SGM (GENERATED). IN OUR EXAMPLE, WE SEE THE FOLLOWING CHANGES HAVE BEEN INDUCED:

	APPORTIONMENT	ALLOCATION
OAS	+2 %	
OASCAS		-3 %
OASBAI		+3 %
C/A	+1 %	
OCA		-1 %
OCA		+1 %

IN ADDITION, OUR ORIGINAL PROGRAM SMOOTHFLOW INSTRUCTIONS ON PROPORTIONS OF OCACAP TO OCASTK AND W/W HAVE CHANGED SLIGHTLY. THIS BECOMES GOOD DATA FOR OUR NEXT SGM EXERCISE AND PROVIDES INFORMATION ON OUR TACTICAL FORCES MIX.

THE ABOVE APPORTIONMENT/ALLOCATION FIGURES ALONG WITH RATIONAL FROM THE TACTICAL EXPLOITATION TEAM DISCUSSIONS ARE FORMED INTO DECISION BRIEFINGS FOR THE CINC AND CACC. MEANWHILE, FRAG GENERATION CONTINUES IN THE COMBAT PLANS DIVISION.

FIGURE A-7.2

THIS PRODUCT PROVIDES SORTIE FLOW INFORMATION CORRESPONDING TO THE SGM.

FIGURES A-7.1,7.2 PROVIDE THE FRAGGER A CROSSCHECK ON COMPUTER GENERATED UNIT TASKING TO ASSURE FEASIBILITY. AS EXPERIENCE PROVIDES CONFIDENCE IN THE COMPUTER ASSISTED FRAG GENERATION SYSTEM, THESE PRODUCTS COULD BE RELEASED TO AUCS TO PERMIT THEM LONGER LEAD TIME ON AIRFRAME/AIRCREW PLANNING AND PREPARATION FOR TOMORROW.

PROCEEDING TO STEP 4 IN THE COMPUTER ASSISTED ATO GENERATION CYCLE, THE FRAGGER INITIATES THE AUTOMATIC FRAG SHELL PRODUCTION PROGRAM. THE FRAG SHELL WHEN COMPLETED WITH TARGETS, WEAPONS AND ALL OTHER NECESSARY INSTRUCTIONS IT BECOMES THE STRIKE GENERATION PROPOSAL. TO PRODUCE THE FRAG SHELL, THE COMPUTER COMPARES THE FLOW SHEET TO THE DATA FILES OF AVAILABLE WING CALLSIGNS, MISSION NUMBERS, AND OTHER NECESSARY DATA. THE RESULT IS A FRAG SHELL WITH MISSION LINE COMPLETE, BASELINE TOT SUPPLIED AND BLANK SPACES TO ACCOMODATE FILL IN TARGETS, WEAPONS LOADS AND ALL OTHER NECESSARY INFORMATION. WHEN COMPLETE, THIS BECOMES THE SGP WHICH IS REVIEWED WITH THE COMMANDER OR DIRECTOR AND AUTHORIZES ITS RELEASE.
